

Domestic Market Highlights**Recent Updates:**

- Sugarcane crushing season has entered its last stage of crushing for the 2022-23 season across India.
- The National Federation of Cooperative Sugar Federation (NFCSF) has estimated sugar production at 327.35 lakh tonnes of sugar for the 2022-23 season. Till 30th April 2023, sugar production has reached 320.30 lakh tonne. The 2022-23 sugar season is expected to end of May and it is estimated to produce about 327 lakh tonnes of new sugar. In addition, about 45 lakh tonnes of sugar is estimated to be diverted to ethanol production.
- The Commission for Agricultural Costs and Prices has recommended a hike in the fair and remunerative price (FRP) of sugarcane to Rs 315 per quintal for a 10.25% sugar recovery rate for 2023-24 against Rs 305 per quintal in the 2022-23 season.
- Sugar prices were stable in most of the major markets across India after the government released higher sales quota for May month. During the last week, domestic demand remained weak due to rains as temperature had come down in most of the regions.
- As per the market sources, Sugarcane area is expected to reduce in the coming season in Haryana. Around 70% of the area under cultivation of the Co-0238 variety of cane is likely to get reduced due to the attack of top borer insects and red-rot disease on the crop.

Sugar Exports:

As per the market sources, the Centre is set to ban exports of sugar amid a decline in production, during the 2022-23 season, mills have so far dispatched around 58 LT for sugar. The government has already capped sugar exports at 60 LT for the current season. The ban would, then, effectively apply only on 2 LT, but will have an impact on market sentiment and check any inflationary trend.

International Market Highlights

- Sugarcane crushing in center south region of Brazil has been affected in the second half of April month mainly due to bad weather which has delayed harvesting. Sugarcane crushing was reported at 21 million tonnes against the expectation of 25.59 million tonne in the second half of April. Sugar output was at 9,89,000 tonne.
- Despite record-high prices for cane, the area under cane cultivation may reduce in Thailand. Sugarcane production in Thailand may fall in the coming season mainly due to expectation of El Nino phenomenon and farmers shifting to other profitable crops (Cassava), sugarcane output for 2023-24 is expected to fall by 21% to 74 million tonne compared to the 2022-23 season.
- Tighter global sugar supplies have supported bullish prices.
- As per the market sources, the global sugar supply is moving towards a lower surplus of 1.1 million tonnes in 2022-23 season mainly due to lower yields in countries like India, Mexico, and the European Union as against the previous estimates of a 2.5 million tonne of surplus.
