

**Today's Update:**

- As per IMD's recent "Long Range Forecast for Southwest Monsoon 2023", with 67 percent probability for normal to above normal rainfall, a normal rainfall is predicted this year. It also added that El Nino impact may be felt during the second half of the monsoon. About 40 percent of El Nino years in the past were years with normal or above normal monsoon rainfall.
- On the other hand, according to the Skymet pre-monsoon forecast, the country is likely to witness below-normal monsoon rainfall this year with a 20 percent chance of drought due to the end of La Nina conditions and the potential for El Nino to take hold. It would be early to predict the impact of the same on Pulses sowing and production as crop size depends on other parameters too including timely rains, distribution patterns and its range. Moreover, IMD is also expected to release its forecast this month which needs to be evaluated accordingly before any conclusion.

**Previous Update:**

- Tur traded down by 2-3%, on an average during the week under review due to fall in C&F quotes mainly from Myanmar and apprehension regarding Govt.'s action against sky rocketing prices. It seems that Myanmar traders are willing to offload their stocks before their local festival Jal Utsav to be celebrated from next week while Indian traders are keeping away from bulk buying amidst fear of Govt.'s action in case Tur prices continue to increase. Tur is likely to trade sideways with bearish sentiment in coming days and prices may come down by INR 200-300 per quintal. However, given the backdrop of lower Kharif crop and extended timeframe for imports till March next year, market sentiments may remain positive in long run. C&F quotes for Burma Lemon Tur decreased by \$25 at \$1025 per MT, basis Indian port.

**International Market Update:**

- C&F quotes for Burma Lemon Tur quoted at \$1050 per MT, basis Indian port.
