

Today's Update:

- The Secretary, Department of Consumer Affairs, reviewed the status of stock disclosure of Tur and Urad with major pulses producing and consuming States recently in a meeting. The number of entities registered and quantities of stock disclosed were reviewed individually with the States and areas where thrust needs to be given were highlighted in order to ensure disclosure by entities such as importers, millers, stockists, traders etc. The States were directed to conduct verification of stocks held by various entities and take strict action on undisclosed stocks under relevant sections of the EC Act, 1955 and the Prevention of Black marketing and Maintenance of Supplies of Essential Commodities Act, 1980. Now, Tur and Urad prices are likely to correct more from current levels in coming days.

Previous Update:

- As per IMD's recent "Long Range Forecast for Southwest Monsoon 2023", with 67 percent probability for normal to above normal rainfall, a normal rainfall is predicted this year. It also added that El Nino impact may be felt during the second half of the monsoon. About 40 percent of El Nino years in the past were years with normal or above normal monsoon rainfall.
- On the other hand, according to the Skymet pre-monsoon forecast, the country is likely to witness below-normal monsoon rainfall this year with a 20 percent chance of drought due to the end of La Nina conditions and the potential for El Nino to take hold. It would be early to predict the impact of the same on Pulses sowing and production as crop size depends on other parameters too including timely rains, distribution patterns and its range. Moreover, IMD is also expected to release its forecast this month which needs to be evaluated accordingly before any conclusion.

International Market Update:

- C&F quotes for Burma Lemon Tur quoted at \$1050 per MT, basis Indian port.
