

Today's Update:

- As per IMD, conditions are becoming favourable for further advancement of SW-monsoon over some more parts of south Peninsular and East India and adjoining areas during 18-21st June, 2023. Weather is likely to remain dry over rest parts of the country. The progress of SW-monsoon has remained slow so far which has halted the sowing intention by growers due to reduction in residual of moisture. However, major Kharif Pulses including Tur, Moong and urad is likely to increase this year given the back ground of significantly hike in MSP couple with higher remunerative prices throughout the year.

Previous Update:

- According to the recent release by Department of Agriculture & Farmers Welfare, farmers have covered 1.805 lakh ha. area under Kharif pulses as on 16th June 2023, significantly down by 57.3% from 4.223 lakh ha. same time last year. Urad has been sown in 0.36 lakh ha, down by 30.8% from 0.49 lakh ha., Moong in 0.37 lakh ha., down by 79.5% from 1.83 lakh ha. and Tur in 0.39 lakh ha., down by 67% from 1.20 lakh ha. same time last year.
- Kharif Tur sowing continued to gain momentum in all States including Karnataka, Maharashtra, MP, UP and AP. Urad coverage remained at 0.392 lakh ha, down by 67.33% from 1.20 lakh ha. as on 16th June, 2023 same time last year. Out of the total covered area, MP covered 0.011 lakh ha, down by 91% from 0.128 lakh ha., Tripura covered 0.018 lakh ha., down by 25% from 0.024 lakh ha. same time last year.
- Given the latest release by MOA regarding the sowing, sowing area is lagging this year as SW Monsoon is still weaken so far due to El-Nino effect couple with current Cyclonic condition in Arabian sea which has negatively affected the monsoon progress. If condition remains same in coming days too, sowing area may also be affected accordingly. Besides, the temperature over the key growing states is increasing due to which the soil moisture condition is depleting fast. Thus, it is likely to affect / delay the progress of sowing.
