

Today's Update:

- The average decrease in buying interest from traders, stockists, millers, and processors kept Tur down by 1-3%, on an average, during the week under review. The government's recent action on stock limits and stagnant C&F offers also affected the sentiments. Tur is likely to trade firm under the present context of higher MSP, supply tightness amidst low import volume, higher import disparity and much time for new crop arrivals in South Africa. Prices may move in a range of INR 100-200 per quintal with slightly firm tone during the week. The recent increase in MSP, along with preliminary indications of a 10-12% rise in sown area for the Kharif 2023 season may push up the sowing coverage this year.
- Additionally, according to trade sources, forward bookings for African Tur crop have been secured, and the country may witness arrivals of African cargoes in August. Tur traded at INR 10400 per quintal, down by 0.95% in Gulbarga and at INR 10200 per quintal, down by 2.86% in Latur. Progress of the monsoon will remain the key factor for sowing coverage as progress of the monsoon has been remained dissatisfactory so far.

Previous Update:

- As per IMD, conditions are becoming favourable for further advancement of SW-monsoon over some more parts of south Peninsular and East India and adjoining areas during 18-21st June, 2023. Weather is likely to remain dry over rest parts of the country. The progress of SW-monsoon has remained slow so far which has halted the sowing intention by growers due to reduction in residual of moisture. However, major Kharif Pulses including Tur, Moong and urad is likely to increase this year given the back ground of significantly hike in MSP couple with higher remunerative prices throughout the year.
