

Today's Update:

- According to the recent release by Gujarat Agriculture Department, farmers have covered 9,622 ha. area under Kharif pulses as on 26th June 2023, down by 45.26% from 17,578 ha. same time last year. Tur coverage remained at 2,643 ha., down by 81.75% from 14,479 ha., Moong at 3,766 ha., up by 89.44% from 1,988 ha., Moth at 370 ha., up by 66.67% from 222 ha. and Urad at 2,842 ha., up by 219.69% from 889 ha. same time last year.

Previous Update:

- Tur witnessed a decline of 2-4% on average during the week under review due to a decrease in C&F offers, and a decline in buying interest among stakeholders following the government's implementation of stock limits and mandatory disclosure of stock positions on a regular basis. C&F quotes for Tur decreased by \$50 to \$1285 per MT at Indian ports during the reviewed week. Despite the current situation, Tur prices are expected to show an uptrend in the long term due to factors such as limited supply, higher minimum support prices (MSP), and the import disparity, along with delays in new crop arrivals from Africa.
- Reports suggest that Tur production in Mozambique is expected to remain unaffected, but areas like Arusha and Baraidili in South Africa may face difficulties due to reduced rainfall. Furthermore, new crop arrivals in Tuboro are expected to be delayed by a month, pushing them to September due to late sowing. Considering the current circumstances, Tur seems bullish even as some correction may be seen in coming days. Prices may fall by INR 200-300 per quintal. Tur traded at INR 10100 per quintal, down by 2.88% in Gulbarga and at INR 10000 per quintal, down by 1.96% in Indore. Progress of the monsoon will remain the key factor for sowing coverage in coming days.
