

Pulses Domestic Fundamentals:

Today's Update

- As per trade sources, total 55,225 MT imported Pulses including Tur, Urad have arrived at Chennai port during 1 to 20th February, 2023. Amongst which 31,400 MT is Tur, 23,825 MT Urad. However, import volume during 1 to 11 February was recorded around 35,900 MT including 20,400 MT Tur, 15,500 MT Urad.

Previous Update:

- According to IMD, weather is likely to be clear and dry across all major Pulses grown areas in India and an alarm raised for rising temperature for NW India (Rajasthan, Gujarat). Currently Chana crop is in maturity to harvesting stage and prevailing higher temperature especially over Rajasthan has negative bearing on crop. In Rajasthan, the crop is in pod filling to maturity stage and rising temp. is posing threat to the crop. However, there has been no threat to the lentil and peas crop which is mainly in central India and temp. as of now is conducive for the crops.
- The rising temperature, is also posing a threat to summer crops mainly Moong and partly urad as the residual soil moisture will deplete fast which would lead to lower sown area where irrigation is unavailable.
- Meanwhile, new Chana and Masur crop arrivals have started in some places of MP and UP but in small quantity and is expected to increase post Holi festival in these two states.

International Market Update:

- C&F quotes also supported the sentiments. Quotes for FAQ and SQ varieties increased by \$15 and \$20 per MT to \$850 per MT and to \$955 per MT, basis Indian ports respectively.
