

Pulses Domestic Fundamentals:**Today's Update**

- Urad traded mix in the range of + / - 1 to 2% despite slight increase in C&F prices amidst limited stock in local markets as well as ports. Trading activities is expected to get affected in Myanmar because of water festival (national holiday) which will last on 25th April. Urad expected to trade in a range of INR 100-200 per quintal due to apprehension of Govt. intervention to cap the rising prices

Previous Update:

- As per IMD's recent "Long Range Forecast for Southwest Monsoon 2023", with 67 percent probability for normal to above normal rainfall, a normal rainfall is predicted this year. It also added that El Nino impact may be felt during the second half of the monsoon. About 40 percent of El Nino years in the past were years with normal or above normal monsoon rainfall.
- On the other hand, according to the Skymet pre-monsoon forecast, the country is likely to witness below-normal monsoon rainfall this year with a 20 percent chance of drought due to the end of La Nina conditions and the potential for El Nino to take hold. It would be early to predict the impact of the same on Pulses sowing and production as crop size depends on other parameters too including timely rains, distribution patterns and its range. Moreover, IMD is also expected to release its forecast this month which needs to be evaluated accordingly before any conclusion.

International Market Update:

- C&F quotes for FAQ remained flat at \$925 per MT while those for SQ variety decreased by \$15 to \$1025 per MT, basis Indian port.
