

Domestic Fundamentals:

- Most of the key spot edible oil markets were remained mixed with weak biasness amid lackluster trading activities.
- According to the third advance estimates released by Ministry of Agriculture soybean production would be around 11.95 million tonnes this year compared to 14.66 million tonnes previous year whereas production of total nine oilseed would be around 32.41 million tonnes compared to 30.94 million tonnes in 2012-13.
- Soybean oil traded weak today on timid global sentiments derived by record production expected in coming season.
- Prices of coconut oil surged a new high as drought in western districts of Tamil Nadu has created a big supply gap in copra. Only local coconut oil crushers procured copra whereas Kerala crushers are not buying much as they have ample stocks with them.
- Diminishing arrivals and lesser availability of mustard seed with crushers has boosted the mustard oil prices. It is believed that the traders and stockiest are developing inventories on expectation of lesser production this year.
- Palm oil noticed a weak movement on higher production prospects on global front in the upcoming season.
- As per the latest government notification, Indian Government has revised the tariff value for crude palm oil to US \$ 920,
 RBD palm oil to US \$943, Crude and refined palmolein to 961, 964 (US dollar per metric tons) respectively. Tariff value is the base price at which the customs duty is determined to prevent under-invoicing.

International Market Fundamentals:

- Malaysian palm oil export during the initial 15 days of May 2014 rose to 28.0 percent to 640,101 tonnes from 500,057 tonnes exported during April 1-15, 2014 as reported by Reuters.
- Global Sunflower seed oil production is likely to decline in upcoming season, 2014/15 by 1.95 percent on reduced planting in EU Russia and Turkey. The production of same is expected around 15.52 million metric tonnes in 2014/15 which was 15.83 million metric tonnes in 2013/14, as estimated by USDA
- Palm oil in European vegetable oil market rose slightly on Monday following larger than expected export of Palm oil from Malaysia. Malaysian palm oil exports for May 1-10 rose 27.7 percent to 391,856 tonnes from 306,765 tonnes for April 1-10.
- Iraq has issued a tender on Monday to buy minimum 10,000 tonnes of sunflower oil, said trade ministry in a statement. The deadline of tender is 26 May, 2014 and offers must remain valid till 30 May, 2014. As per the ministry's statement oil could be sourced from any origin apart from China.
- As per the USDA latest report, Soybean production on global front is likely to be around 300 million tonnes, higher than 284 million tonnes in 2013/14, which is adding weight to the global soybean stocks and ultimately hurting the prices.
- Soybean crop in Brazil, which is in the end phase of harvesting will produce 86.57 million tonnes of oilseed, which was
 earlier expected to be around 86.08 million tonnes, as forecasted in April, said Conab, the Agriculture Ministry's crop
 supply agency.
- Ukraine, the major producer of sunflower oil in the world, is likely to produce 4.25 MMT of sunflower oil by the end of MY 2013/14, which is around 14 percent higher than the previous season. In My 2014-15 the country is expected to produce 4.3 MMT of sunflower oil, recording another growth of 3 percent.
- Argentina soy crop production is likely to touch the level of 55.5 million tonnes this season. Earlier it was estimated to be around 54.5 million tonnes. Reason for the same is the yield, which stood higher what was expected earlier.
- Stock of palm oil in Malaysia is being reported a three month high in April. Palm oil stock reached to 1.70 MMT in April, which was 1.69 MMT in March. The stockpile in Malaysia, world second largest palm grower, is putting pressure on the benchmark prices i.e. FCPO.
- BMD CPO could move with slight fluctuation but any uptrend is not being gestured in near term due to Strong Ringgit, as reported by the market participants.
- Soybean imports in China during April 2014 is estimated around 6.5 million tons, nearly 40.6% higher than the imports in March 2014, which stood around 4.62 million tons.
- According to market participants, Palm oil production is expected to decline by 5-10% this year in Indonesia as a effect of El Nino. The country produced around 26 million tones of Palm oil in 2013.

Outlook: Edible oil basket is expected to feature steady tone in the near-term.
