

### Domestic Fundamentals:

- Mixed sentiments in the various edible oil prices in different market centers noticed on Saturday owing to need based demand and absence of market cues from international veg. oil market.
- Rapeseed oil featured gains tracking unfavorable weather over key rapeseed growing regions of Rajasthan. On the planting front, Indian farmers have been sown 60.18 lakh hectares of mustard seed (2014-15 crop year) as on 03 Dec. 2014, which was 64.54 lakh ha. higher compared to the last year same period. State wise details - in Rajasthan has been sown in 25.84 (29.27) lakh hectares, in MP sowing reached at 6.40 (7.79) lakh hectares and in UP sowing reached to 11.31 (10.26) lakh hectares. Values in bracket were last year same period figures. Three states above together account 70 percent of the total normal Rabi mustard acreage.
- As per Reuters survey, median survey of six planters, traders and analysts pegged Malaysian palm stocks at 2.29 million tons, up 5.9 percent on m-o-m basis which is highest in 21 months as production did not ease as much as initially expected, and instead outstripped export demand. November crude palm oil production seen down to 1.8 million tons (-4.9 percent) from a month ago.
- According to an estimate by a Chinese chamber of commerce, China is likely to import 73.5 million tonnes in 2014/15 (Oct/Sept), a rise of 4.5 percent from the previous year. However, USDA forecast soybean imports by Chinese buyers at 74 million tons.

**Outlook:** Edible oil basket is expected to feature range bound on need based buying in the spot market.

Futures market were closed on Saturday (Quotes updated as on 5 Dec, 2014 (Friday),
