

Domestic Fundamentals:

- Steady to weak sentiments witnessed in the various edible oil prices in different market centers owing to need based buying and losses in the international soy oil market.
- CIF soybean oil quoted at USD 884 per tons for Jan delivery and Feb. delivery is offered at USD 875 per tons at Indian port as on 13 Jan., 2015. Better than expected soybean supplies forecast and bearish crude mineral oil prices weigh on the market sentiments.
- As per Chinese custom data, China imported a record 8.53 million tons of soybeans in December, up 41.5 percent on m-o-m basis and 16.8 percent higher from same period of the last last year. Moreover, ministry also forecast that January imports would slip to 5.4 million tons.
- Palm oil production in Malaysia was down 22.2 percent on m-o-m and 18.07 percent lower from same period of the last year due to floods and production is likely to remain on lower side in January.
- Crude palm oil featured losses on Tuesday's trading session tracking bearish USDA's WASDE report and profit booking. However, monsoon floods over key palm growing regions limit excessive losses which raise the fear of tight palm oil supply.
- As per cargo surveyor Intertek Testing Services, exports of Malaysian palm oil products for Jan. 1-10 fell 12.7 percent to 355,846 tons from 407,425 tons for Dec. 1-10. India & subcontinent import 63,300 tons of palm oil products from Malaysia during 1-10 Jan. v/s 74,700 tons last month same period.

Outlook: Edible oil basket is expected to feature range bound to slightly firm tone on need based buying in the spot market.
