

**Domestic Fundamentals:**

- Most of the edible oils markets ended slightly higher on renewed demand at lower quotes and gains in the international oil market. However, uncertain demand prospects caps excessive gains, Wednesday.
- India is set to harvest 7.36 million tonnes of rapeseed in the current crop year down from last year. Lower rapeseed production in the current season mainly attributed to the drop in India's mustard acreage (down 7 percent y-o-y) in the current season and dryness in the initial days of sowing - Farm Ministry. Mustard oil at Alwar market featured slight gains on renewed demand at lower quotes. Mustard oil at Alwar market is offered at Rs 770 per 10 Kg.
- Stockists remain reluctant to take huge position ahead of new soybean crop arrivals from South American countries in March/April and with a rising temperature edible oils demand fall. However, floods in Malaysia during the first half of January hurts the palm oil supply prospects and use of biodiesel initiatives in South East Asian countries may caps excessive losses.
- Malaysian palm oil futures ended slightly higher tracking gains in the international soybean markets ahead of the Chinese Lunar New Year. However, supply side prospect remain good and sluggish demand caps prices going much higher.
- Exports of Malaysian palm oil products for Feb. 1-15 fell 4.9 percent to 508,955 tonnes from 535,651 tonnes shipped during Jan. 1-15, cargo surveyor Intertek Testing Services. India & subcontinent imported 129,050 tons during 1-15 Feb. v/s 106,400 tons same period of last month.

**Outlook:** Edible oil basket is expected to feature range bound on need based buying in the spot market.
