

**Domestic Fundamentals:**

- Firm trend witnessed in most of the edible oils market tracking gains in the international oil market. However, profit booking witnessed in the crude palm oil prices in the cash market.
- As per sources, lean season and forecast of lower rains in the current season may affect groundnut seed production. Moreover, lower rainfall prediction over key groundnut seed producing regions in the coming monsoon season may check the crop shifting. As per IMD, monsoon rainfall forecast is 90 percent over Central India, 92 percent over South Peninsula and 90 percent over northeast and the worst forecast is set at 85 percent for North Western India.
- Soybean sowing may be delayed by week or first week of July this season in Madhya Pradesh due to some delay in arrival of monsoon over key growing regions of Central India. Ideal sowing window is open in between 15-30 June for soybean crop. However, it can extend to second half of July.
- Exports of Malaysian palm oil products for May rose 44.7 percent to 1,553,281 tons from 1,073,482 tonnes shipped during April, cargo surveyor Intertek Testing Services. Top Malaysian palm oil buyer's import position in May - European Union 350,964 tons (168,882 tons), China 365,899 tons (266,510 tons), and India & subcontinent 415,238 tons (147,990 tons). Values in bracket depict last month import values in metric tons.
- Malaysia's palm oil stocks at the end of April rose 17.6 percent to 2,194,198 tonnes against a revised 1,865,927 tonnes at the end of March, industry regulator Malaysian Palm Oil Board.

**Outlook:** Edible oil basket is expected to feature mix tone with soy and palm with weak tone while rapeseed/mustard oil with firm trend and in the spot market, in near-term.
