

Domestic Fundamentals:

- Steady tone featured in the edible oils at various cash markets Saturday.
- The demand remained flat across the key markets.
- The monthly MBOP demand and supply report was more bullish with reports of lower palm oil inventories, lower production and higher exports.
- However, USDA monthly supply and demand report was bearish with unexpectedly US soybean yield at flat 46 bu per acres compared to June estimate.
- However, fall in imports by major importing countries is cause of concern as SGS reported Malaysia Palm oil exports from 1-10 July fell 34.7 percent. India purchased higher Palm oil concerns of draught in June while higher imports from major countries were due to Ramzan and Indonesian Palm oil export levy. Palm oil prices should recover as Ringgit has weakened, lower Malaysia Palm oil ending stocks and attractive prices at current levels. China demand and Greek debt crisis worries are of equal concern.
- Bad weather in US has impacted the soybean crop condition leading to CME rally in Soy complex. USDA trade estimates of soybean ending stocks in US have been revised lower, report is due on today. Greek crisis and fall demand from China is certainly a cause of concern and is mainly driving the markets. Domestically high stocks in ports and in pipelines and expectation of surge in imports and high carryover stocks of soybean in India due to negative crush margins in 2014/15 will put lid on prices
- According to MPOB, Malaysia's Palm oil ending stocks for June 2015 was at 2,151,287 tons (2,248,577 tons.), down 4.33 percent from May 2015. Trade estimates of Malaysia's Palm Oil ending stocks were at 2.12 million tons. Production for June was at 1,763,928 tons (1,810,709 tons), down by 2.58 percent from May. Exports were higher by 5.19 percent at 1,697,256 tons (1,613,566 tons). Imports were higher by 2.36 percent at 103,496 tons (101,108 tons). Values in brackets are figures of May 2015.
- According to SGS, Palm oil exports from Malaysia fell by 34.7 percent during 1-10 July to 308,875 tons (473,307 tons). Top buyers were China at 89,227 tons (85,010 tons), United States 35,564 tons (21,650 tons), European Union 31,130 tons (86,400 tons), India 10,500 tons (75,300 tons), Pakistan 5,500 tons (22,300 tons). Values in brackets are figures of same period in last month.
- US soybean planting is reported at 96% by 05 July lower than 5 year averaged also lower compared to 100% during the same period last year. Soybean emergences is reported at 93% lower than 5 year average of 97% and also lower from 97% during the same period last year. Further, about 21% is blooming which is at par with the 5 year average and lower from 22% compared to last year. The crop is in 63% good to excellent against 72% during the same period last year.

Outlook: Edible oil basket is expected to feature mixed tone with weak soy and palm and firm rapeseed/mustard oil in the spot market, in near-term.
