

Domestic Fundamentals:

- Soy oil, mustard oil, refined sunflower oil, groundnut oil prices traded sideways in various trading centers. Palm oil and refined cottonseed oil featured lower at various key centers on Thursday.
- Domestic soybean oil prices are under pressure due to surging imports and stocks at ports and in pipelines. High carryover stocks of domestic soybean due to negative crush margins and prospects of good soybean crop are underpinning prices. If the crush margins will continue to remain negative then imports of soybean oil will increase. USDA estimates of soybean and soybean oil ending stocks of US were surprising due to higher yields of soybean leading to higher production and higher crush leading to higher ending stocks for both which is bearish for the market.
- USDA in its August estimate raised 2015/16 soybean oil imports of India by 1.5 lakh tons to 28 LT (26.5 LT- July estimate) higher by 12 percent from 2014/15 imports of 25 LT. Domestic consumption has been increased to 44 LT (42.5 LT July estimate) from 38 LT in 2014/15 higher by 15.8 percent y-o-y. Lower prices of soybean oil in international market and global edible oil surplus is the primary reason increased import.
- US soybean crop progress report, as on 9 August, about 88% of the crop is blooming which is slightly lower than the 5 year and last year average of 91%. About 69% of the crop is reportedly in pod formation stage which is higher than 5 year average of 66%, but slightly lower from 70% last year. 63% of the crop is in good to excellent condition as against 70% during the same period last year.
- Indonesia's July palm and palm kernel oil exports fell by 8 percent in July to 2.09 MMT from 2.27 MMT in June. Leading export destinations were India at 427,340 tons, China at 407,330 tons, European Union at 380,130 tons, Pakistan at 195,830 tons, Bangladesh at 47,000 tons and Middle East at 100,320.
- Malaysian Palm Oil Board (MPOB) in its July monthly report pegged ending stocks of Palm oil higher by 2.93 percent to 22.65 lakh tons in July 2015 against revised June 2015 ending stocks figure at 21.5 lakh tons. Palm oil production rose 2.93 percent to 18.16 lakh tons (17.64 lakh tons) in July 2015. Exports fell by 5.61 percent to 16.02 lakh tons in July 2015 against revised figure of 16.97 lakh tons in June 2015. Imports rose to 1.43 lakh tons (1.03 lakh tons) in July 2015. Values in brackets are figures of June 2015.
- According to SGS, Malaysia's 1-10 August Palm oil exports rose by 57.5 percent to 486,451 tons (308,875 tons). Top buyers were India at 106,050 tons (10,500 tons), European Union at 108,255 tons (31,130 tons) tons, China at 94,500 tons (89,227 tons), Pakistan at 38,500 tons (5,500 tons) and United States at 2,000 tons (35,564 tons). Values in brackets are figures of same period last month.

Outlook: Edible oil basket is expected to feature mixed tone with weak soy and palm and firm rapeseed/mustard oil in the spot market, in near-term.
