

Domestic Fundamentals:

- The edible oil prices mostly remained flat on steady demand. However, several vegoil trading houses remained closed due to festivities Saturday.
- CNF CPO at Indian port is quoted at \$545 per ton for January delivery. Moreover, RBD palmolein (Malaysian origin) CNF at Indian port is offered at \$575 per ton for January delivery. High sea duty paid CPO Kandla is quoted at Rs 402 per 10 Kg and for January delivery is quoted at Rs 405 per 10 kg. CDSO CIF at Indian port is offered at \$734 per ton for January delivery. Canola CIF is quoted at USD 740 per ton for January delivery.
- Groundnut oil, Rajkot prices have risen on improved demand due to peak consumption season in Gujarat. Rapeseed oil prices are expected to rise on low availability of rapeseed in Rajasthan. Stock limit imposed in Rajasthan has depleted stocks of rapeseed, so arrivals have slowed down.
- Impact of El Nino has prompted change in sentiment in palm oil towards upside. Market has been buoyed by lower production in Peninsular Malaysia especially in Johor. Arrival of monsoon in Southeast Asia will have limited impact on palm production. Dry weather is expected to lower yields. Lower export numbers of Malaysia and Indonesia is concern for market but demand will be good for January on Chinese New Year. Malaysia has kept its export duty of palm unchanged at zero for January 2016. Malaysian Ringgit appreciation will hit prices. Prices are in range.
- Rains in key growing regions overnight and forecast of rains in next 10-15 days is expected to pull down prices of soy oil. Crude oil prices will support soy oil on lifting of export ban on export of crude oil in US. NOPA report showed that soy oil production in US fell in November on lower crushing on slow farmer sales and weak demand for soy meal. However, soy oil stocks in US rose in November. Structural measures taken by Mauricio Macri government to improve the condition of soybean industry will affect global soybean complex markets in longer term. Argentina farmers will offload their soybean stocks gradually and is expected to plant soybean crop in record area.
- According to Indonesia trade ministry, Indonesia kept export duty to at zero, unchanged at zero. Indonesia has kept export duty to zero since September 2014 to zero on swelling palm oil stocks in the country. Indonesia reported November palm oil exports lower by 9.4 percent, according to GAPKI. Indonesia has embarked on ambitious biodiesel program to raise palm oil blending from 15 percent to 20 percent which will raise Indonesia biodiesel output five fold in 2016. However, with low crude oil prices the program risks failure.
- According to Malaysia government, Malaysia has kept palm oil export duty unchanged at zero. Tax is calculated a reference price of 2,033.94 ringgit (\$472.24) per ton for January. Price above 2,250 ringgit per ton is taxed, starting from 4.5 percent to a maximum of 8.5 percent.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's December 1-20 palm oil exports fell by 25.1 percent at 744,563 tons v/s 993,943 tons in the corresponding period last month. Top buyers were European Union at 222,005 tons (223,444 tons), India at 112,800 tons (230,700 tons), United States at 70,042 tons (66,905 tons) and China at 20,100 tons (92,900 tons). Values in brackets are figures of corresponding period last month.

Outlook: Edible oil basket is expected to feature weak soy, palm and rapeseed/mustard oil in the spot market, in near-term.
