

**Domestic Fundamentals:**

- Firm sentiment featured in various edible oils at different centers Friday.
- CNF CPO at Indian port is quoted at \$680 per ton for May delivery. Moreover, RBD palmolein (Malaysian origin) CNF at Indian port is offered at \$685 per ton for June delivery. High sea duty paid CPO Kandla is quoted at Rs 541 per 10 Kg and for June delivery is quoted at Rs 537 per 10 kg. CDSO CIF at Indian port is offered at \$761 per ton for JJ delivery. Canola CIF is quoted at USD 785 per ton for June delivery.
- Depreciation of Ringgit and better exports of palm oil ahead of Ramadan will support palm oil prices in near term. Exports of palm increased in May indicating that demand will be firm in near term. Lower prices of palm have enhanced demand especially from Malaysia. Aggressive pricing by refiners from Malaysia has led to buyers shifting from Indonesia to Malaysia. Demand from India has increased on higher imports of RBD palmolein. Lower differential between Malaysia RBD Palm and CPO Indonesia has prompted India to purchase more from Malaysia. Fall in stocks of palm in Malaysia in May will be limited on rising production. However, production will increase in single digits while production from Indonesia will face the worst month of May. Condition of production will improve in Indonesia from June onwards while effect of El Nino will be reversed by La Nina in second half of 2016. Prices of palm oil are in range with upward bias.
- Crop losses of soybean in Argentina can reach up to 8 MMT which has led to soy meal rally in last month. Buenos Aires grains exchange kept forecast of Argentina soybean crop at 56 MMT on higher yields in some states with major losses in three key states. Harvesting has reached 72 percent, 18 percent above corresponding period last year. With soy oil contribution in soybean products falling as low as 27.2 percent has set the rally due to spreading with soy meal. Rally is set to continue due to spreading. Sowing picked up in US last week above 5-year average and equivalent to last year's planting in corresponding period. Yields are expected to be higher on good moisture in growing areas. More soybeans are expected to be planted in US on higher soybean/corn ratio. Soy oil stocks in US rose as reported by NOPA rose in April from a month ago is bearish for soy oil. Stocks of soy oil are 35 percent above last year level in corresponding period. Production is expected to be higher in May on higher realization due to higher price of soy meal which may increase soy oil stocks in US and underpin prices. Rise in crude oil prices will support soy oil prices in near term. Prices of soy oil are in range with upward bias.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's May 1-25 palm oil exports rose 11.2 percent to 981,630 tons from 882,967 tons in the corresponding period last month. Top buyers were India at 278,180 tons (128,000 tons), European Union at 159,245 tons (121,802 tons), China at 96,450 tons (107,218 tons), United States at 56,795 tons (56,795 tons) and Pakistan at 47,850 tons (21,500 tons). Values in brackets are figures of corresponding period last month.

**Outlook:** Edible oil basket is expected to feature firm soy, palm and rapeseed oil in the spot market, in near-term.
