

#### **Domestic Fundamentals:**

- Weak sentiment featured in various edible oils at various centers on Friday.
- Firm demand from India and China had supported prices in near term. Palm oil exports data for first 25 days of August indicate firm demand from Malaysia which will reduce palm oil end stocks in August. Production of palm in Malaysia is not expected to rise at a very high rate due to lagged effect of El Nino.
  - Demand is strong especially from India which is buying more as its domestic market is tight. Buyers from India are mostly interested in Malaysian palm products over Indonesia CPO. India's domestic CPO prices are indicative of the tight market and prices at CNF indicate higher demand of RBD palmolein over Indonesia CPO.
  - China is expected to buy more ahead of festivals in September and higher buying in second half of 2016 to replenish stocks depleted in first half of 2016. China's palm oil imports of July indicate that demand has been weak in 2016. However, demand is expected to improve for rest of the year.
  - Depreciation of Ringgit is expected to support prices in near term. Prices of palm oil are in range.
- Soybean crop is in very good condition in US and record yield is expected in 2016/17 by USDA. Soybean crop tour in US has indicated very good crop condition in US Midwest which will underpin soy complex prices in near term. Spreading of soy oil with soy meal is expected to support soy oil prices on CBOT in near term.
   According to NOPA, soy oil stocks reduced in US in July due to lower production of soy oil and higher use which has supported soy oil prices in near term. Stocks of soy oil is expected to drop further in US due to low crushing of soybean
  - supported soy oil prices in near term. Stocks of soy oil is expected to drop further in US due to low crushing of soybean as farmers are awaiting record US crops. Crushers are working hand to mouth in US, which will reduce stocks of soy oil of US in August and support prices. Rise in crude oil prices and weak dollar will support soy oil prices in near term. Prices of soy oil are in range.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's August 1-25 palm oil exports rose 29.8 percent to 1,316,245 tons compared to 1,013,704 tons in the corresponding period last month. Top buyers were India at 392,416 tons (168,330 tons), European Union at 249,915 tons (217,388 tons), China at 216,550 tons (184,756 tons), United States at 60,385 tons (69,050 tons) and Pakistan at 17,000 tons (30,000 tons). Values in brackets are figures of corresponding period last month.
- According to China's General Administration of Customs (CNGOIC), China's July palm oil exports fell 53.73 percent to 332,568 compared to July 2015. Year to date (January 2016-July 2016) palm oil imports fell 31.14 to 2,198,299 tons compared to corresponding period in 2015. Imports from Indonesia in July fell 58.14 percent to 169,474 tons compared to July 2015. Year to date (January 2016-July 2016) palm oil imports from Indonesia imports fell 14.59 percent to 1,389,331 tons compared to corresponding period in 2015. Imports from Malaysia fell 48.04 percent in July to 163,081 tons compared to July 2015. Year to date (January 2016-July 2016) palm oil imports from Malaysia fell 48.47 percent to 803,758 tons compared to corresponding period in 2015.

Outlook: Edible oil basket is expected to feature firm soy, palm and rapeseed oil in the spot market, in near-term.
