

Domestic Fundamentals:

- Edible oils mostly witnessed weak tone at various market centers on Monday.
- Palm oil end stocks rose in Malaysia in September by 5.67 percent which was more than estimate. Rise in end stocks of palm oil is primarily due to fall in exports which came more than estimated. Production rose marginally indicating lagged effect of El Nino. Production is expected to rise more in October. Lower exports were primarily due to lower imports from India and China. India's demand was weak in September as the markets were already covered for festivals. China imports weakened due as festivals were over in September and National holidays. However, China's demand will stay firm for rest of the year. Fall in prices of competitive and weak exports from Malaysia will underpin palm oil prices in near term. Ringgit depreciation is expected to support palm oil prices in near term. Demand of palm oil in medium term will depend upon the arrival of winter in India, China and EU. Prices are in range
- Argentina decreased its soybean crop estimate of 2016/17 to 53 MMT from 56 MMT in its previous estimate. Lower
 production of Argentina is due to lower area under production on postponing of expected reduction in export duty of
 soybean and soybean products to 2018 which will lead to higher planting of corn and wheat.
 US soybean crop is in very good condition and harvesting pace has improved and yields are very impressive indicating

that USDA will increase soybean crop in US in its October estimate. Weather is forecast to be clear in most parts of Midwest supporting harvesting. Soybean stocks in US at the end of September rose to record in five years due to lower crush of soybean on record crops expected in US. There is little demand of soy oil and soy meal in crushers is running only to cover demand as market participants expect price correction. Lower crush of soybean will decrease production of soy oil and decrease stocks of US and underpin prices.

Brazil soybean crop is expected to be 101-104 MMT, according to CONAB due to lower increase in area allocation due to dryness in Mato Grasso and record prices of corn in its market.

Rise in crude oil prices will support soy oil prices in near term. Prices are in range.

- According to cargo surveyor Societe Generale de Surveillance, Malaysia's October 1-10 palm oil exports rose 1.9 percent to 403,650 tons compared to 395,970 tons in corresponding period last month. Top buyers were European Union at 83,172 tons (74,680 tons), China at 74,780 tons (67,700 tons), India at 43,024 tons (48,000 tons), Pakistan at 18,750 tons (30,000 tons) and United States at 6,050 tons (12,335 tons). Values in brackets are figures of corresponding period last month.
- According to Malaysia Palm Oil Board (MPOB), Malaysia's September palm oil end stocks rose 5.67 percent to 15.47 lakh tons compared to 14.64 lakh tons in August. Palm oil end stocks are above market expectations. Production rose marginally by 0.78 percent to 17.15 lakh tons compared to 17.02 lakh tons in August. Exports fell 20.42 percent in September to 14.51 lakh tons compared to 18.24 tons in August. Imports fell 80.51 percent in September to 0.18 lakh tons. Fall in end stocks are primarily due to lower exports and rise in production was marginal due lagged effect of El Nino.

Outlook: Edible oil basket is expected to feature weak soy, palm and rapeseed oil in the spot market, in near-term.
