

### **Domestic Fundamentals:**

- Mixed sentiment featured in various edible oils at various trading centers on Saturday.
- Soy oil (Indore) was unchanged compared to previous close. On CNF prices of CPO prices moderated while it rose in Kandla high seas. RBD palmolein moderated on CNF was unchanged in Kandla high seas. Mustard oil prices were unchanged from previous close. Sunflower oil domestic and CNF prices were unchanged. Markets are ranged bound.
- Palm oil imports are estimated lower due to higher prices of palm oil in domestic market and low soy oil premium over soy oil. Soy oil imports moderated in oil year 2016-17 on higher domestic oilseed crop. USDA has curt both year import figure. Stocks at ports and pipelines have dried in last one year on lower edible oil imports.
- Palm oil- Palm oil end stocks rose in Malaysia in April due to lower than expected rate of growth of production. Production rose 5.7 percent. Exports counted lower rate of growth in April.
  - Exports from Malaysia in first ten days of May rose 15 percent due to demand ahead of Ramadan. However, demand from India and China is still weak and prices will struggle to recover if demand do not increase to both destinations. Ringgit depreciation too has supported palm oil prices in near term.
  - Strong competitive oils like CBOT soy oil and RBD palmolein DALIAN.
  - Production of palm oil is expected to recover all losses in 2016 in Malaysia and Indonesia in 2017 to pre El Nino levels. Rise in crude oil prices will support palm oil prices. Prices are in a range.
- Soy oil- Soybean planting in US is progressing at a weak pace on rains in previous weekend in US Midwest. However, dry weather since then has supported planting. Rains are expected to return to US Midwest after last week. Planting is below last year and 5-year average.
  - Brazil state agency Conab increased Brazil soybean crop to 113 MMT form 100.2 MMT on higher area and yields. Similarly Buenos Aires Grains Exchange increased soybean crop in Argentina to 57.5 MMT form 56.5 MMT from its previous estimate. Higher crop is due to higher yields due to wet weather.
  - Decision by US trade commission to investigate allegation of dumping of soy oil based biodiesel in US by Argentina, will support soy oil prices in near term. This comes after Commerce department voted to conduct allegation of dumping and unfair subsidies by Argentina. The commission has said that dumping has caused harm to US producers.
- According to United States Department of Agriculture (USDA) May estimate, India's soy oil imports are reduced 1 lakh tons to 3.7 MMT from 3.8 MMT in its April estimate. Domestic consumption is reduced 1 lakh tons to 5.4 MMT from 5.5 MMT in its April estimate. End stocks are reduced to 4.31 lakh tons from 4.51 lakh tons in its April estimate.
- According to United States Department of Agriculture (USDA) May estimate, India's palm oil imports are reduced 2.17 percent to 9 MMT from 9.25 MMT in its April estimate. Domestic consumption is reduced by 5 lakh tons to 9.25 MMT from 9.75 MMT in its April estimate. End stocks estimate is reduced 1 lakh tons to 4.46 lakh tons from 5.46 lakh tons in its April estimate.

Outlook: Edible oil basket is expected to feature weak sentiment in near term.
