

Domestic Fundamentals:

- Firm sentiments featured in various edible oils at various trading centers Saturday.
- Palm oil- Palm oil production in Malaysia in June is expected to be adversely affected by weaker production as workers take leave due to Ramadan.
Rise in competitive oil like soy oil CBOT and RBD palmolein DALIAN supported the rise. Weaker ringgit is also providing support.
Exports of palm oil from Malaysia fell by 14-17 percent in first 15 days of June due to weak demand from top importing destinations. Shipments have slowed after 10 June as demand wane as stocks are covered for Ramadan. Exports from Malaysia will show weak June after strong May.
End stocks of palm oil fell 2.6 percent at the end of May from Malaysia due to rise in exports due to Ramadan which rose 17.3 percent m-o-m. Production rose 6.9 percent as lagged effect of El Nino fades. Fall in stocks was due to rise in exports and slow rise of production. Fall in stocks will support palm oil prices.
Production will rise on seasonal uptrend of production as lagged effect of El Nino fades. Prices are in a range.
- Soy oil- Rise in end stocks of soy oil as reported by NOPA due to lower production of soy oil on lower crush of soybean will underpin prices of soy oil in medium term. Soybean crush figures beat market estimates.
Soybean planting is progressing in US at steady pace. Beneficial rains in US Midwest over last some days are expected to support planting of soybean. Crop is in development stage and its crop condition is expected to be above average in near term.
Demand by China is expected to be weak in July after record May and June as cargoes are cancelled or are diverted due to glut created by record soybean imports. Soybean crush margins are negative in China which has led to record low prices of soy oil in 5 years.
Good crop condition in US, strong supply from South America and weak Chinese demand has led to record short positions on CBOT by speculators. Fall in crude oil prices will underpin prices in near term. Prices are in a range.
- According to National Oilseed Processors Association (NOPA), U.S. May soybean crush rose 7.27 percent to 149.246 million bushels from 139.134 million bushels in April 2017. Crush of soybean in May 2016 was 152.280 million bushels. Production of soy oil in U.S. in May rose to 1.752 billion lbs from 1.627 billion lbs in April 2017. Production in May 2016 was 1.786 billion lbs. Soy oil stocks in U.S. at the end of May rose 1.37 percent to 1.749 billion lbs compared to 1.725 billion lbs in April 2017. Stocks of soy oil in May were lower by 12.26 percent compared to May 2016, which was reported at 1.994 billion lbs. Yield was higher at 11.74 lbs/bushel in May compared to April figure of 11.69 lbs/bushel. Yield in May 2016 was reported at 11.73 lbs/bushel.
- According to Malaysia Palm Oil Board (MPOB), Malaysia increased July crude palm oil export duty to 6.5 percent from 6 percent in June. Tax is calculated at reference price of 2890.04 ringgit (\$676.53) per ton. Tax is calculated above 2,250 ringgit starting from 4.5 percent to a maximum of 8.5 percent.

Outlook: Edible oil basket is expected to feature weak sentiment in near term.
