

### **Domestic Fundamentals:**

- Weak sentiments featured in various edible oils at varied key market centers Friday.
- Imports of edible oils showed big jump in June on the back of higher imports of CPO, RBD palmolein and sunflower oil. Palm oil imports grew 35 percent on back of demand ahead of Ramadan. Soy oil imports fell in June after strong April and May. Demand of RBD palmolein is steady due to inverted tax structure in Malaysia and favorable tax structure in India which supports its imports. SEA has asked from hike in import duty on crude edible oil at 20 percent and refined oils as 35 percent thereby maintaining a gap if 15 percent between crude and refined oils.
- Palm oil- Weakness in CBOT soy oil and RBD palmolein DALIAN along with appreciation of ringgit has led to fall in prices of palm oil in near term.
  - Weak exports of palm oil from Malaysia to top importing destination (India) are expected to underpin palm oil prices in near term. India purchased most of the sales from Malaysia in June due to demand ahead of Ramadan. After Ramadan India is purchasing less due to low premium of soy oil over palm oil.
  - Production is expected to rebound in Malaysia after 8 percent fall in June as production picks up after arrival of Monsoon. Production fell June in Malaysia due to loss in production on labor shortage on Ramadan.
  - Stocks of palm oil are expected to increase in Malaysia in July on higher production and weak exports. Appreciation of Ringgit will underpin prices in near term.
- Soy oil- USDA increased soy oil stocks in US in 2017/18 due to higher opening stocks and higher imports. Soybean
  exports from US to China rose y-o-y. China is expected to import 94 MMT of soybean in 2017/18 after imports of 91
  MMT in 2016/17.
  - Rise in temperature in US Midwest and dry condition in top soybean producing belts has supported soybean complex prices. If high temperature sustains than crop condition will deteorate further.
  - USDA reported lower planting rating in its weekly planting report. Good to excellent condition decreased 62 percent, fall by 2 basis points in a week indicating that crop condition is not good as last year but above 5-year average. Pod formation is above last year and 5 year average due to early planting. However forecast of dry weather will distress crop in coming days. Weak progress of soybean crop will support soybean complex prices.
  - Weak crude oil will underpin soy oil prices in near term.
- According to Solvent Extractors Association (SEA), India's June edible oil imports rose 11.6 percent y-o-y to 12.94 lakh tons from 11.59 lakh tons in June 2016. Palm oil imports in June rose 34.9 percent y-o-y to 8.2 lakh tons from 6.08 lakh tons in June 2016. CPO Imports rose 38.4 percent y-o-y to 5.72 lakh tons from 4.16 lakh tons in June 2016. RBD palmolein imports rose 26.3 percent y-o-y to 2.40 lakh tons from 1.90 lakh tons in June 2016. Soy oil imports fell 24.6 percent y-o-y to 2.91 lakh tons from 3.86 lakh tons in June 2016. Sunflower oil imports rose 15 percent y-o-y to 1.69 lakh tons from 1.47 lakh ton in June 2016. Rapeseed (Canola) oil rose to 0.13 lakh tons in June compared to 0.18 lakh tons in June 2016.

Outlook: Edible oil basket is expected to feature weak sentiment in near term.
