

### **Domestic Fundamentals:**

- Mostly sideways to weak sentiments featured in various edible oils at various key market centers Friday.
- CNF CPO at Indian port is quoted at \$682.5 per ton for July delivery. Moreover, RBD palmolein (Malaysian origin) CNF at Indian port is offered at \$680 per ton for July delivery. High sea duty paid CPO Kandla is quoted at Rs 491 per 10 Kg and for July delivery is quoted at Rs 487 per 10 kg. CDSO CNF at Indian port is offered at \$802 per ton for July delivery. Soy oil (Indore) is quoted at Rs 635 per 10 kg. Canola CIF is quoted at USD 810 per ton for August delivery.
- Palm oil- Expectation of higher exports from Malaysia in June is expected to assist palm oil prices in near term. Exports
  grew to EU and China on strong buying from these countries. Exports grew by 7-15 percent in first 20 days of July from
  Malaysia, according to cargo surveyors SGS and ITS.

China is buying more as soy oil prices have recovered in the country after hitting 5-year lows which was evident in RBD palmolein in near term. CNGOIC China is expected to import 450,000 tons of palm oil in August and September. Further, Chinese buyers purchased 3 cargoes of 80,000 tons.

However, appreciation of ringgit will pose risk to prices.

Expectation of rise in production of palm oil in Malaysia is expected to underpin palm oil prices in medium term.

Production is expected to rebound in Malaysia after 8 percent fall in June as production picks up after arrival of Monsoon.

Lagged effect of El Nino have pushed peak harvest season to October which will increase stocks in Malaysia.

- Soy oil- Soy oil is prices are supported by dry weather in soybean growing regions in US Midwest. Weather models point towards hot and dry conditions in coming days. This has led to rise in soybean complex prices. Soy oil stocks fell in US in June as reported by NOPA due to lower crush of soybean. Stocks were lower by 2.63 m-o-m and 14.2 percent y-o-y. Lower soy oil stocks in US will support soy oil prices in medium term. USDA reported lower planting rating in its weekly planting report. Good to excellent condition decreased to 61 percent, fall by 1 basis points in a week indicating that crop condition is not good as last year but above 5-year average. Pod formation is at last year and above 5 year average due to early planting. Weak crop condition will support soybean
- In India soybean areas in Madhya Pradesh received good rainfall in last 7 days which will assist soybean crops. Sowing is expected to be below last year due to bad remuneration of soybean. Further, higher imports of cheap edible oils have added to farmers distress. Soybean prices are still trading below MSP in main mandis across India.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's July 1-20 palm oil exports rose 15.2 percent to 817,961 tons compared to 710,322 tons in corresponding period last month. Top buyers were European Union at 221,380 tons (160,005 tons), China at 136,701 tons (61,900 tons), India at 104,100 tons (126,250 tons), United States at 31,986 tons (41,162 tons) and Pakistan at 23,000 tons (58,830 tons). Values in brackets are figures of corresponding period last month.

Outlook: Edible oil basket is expected to feature weak sentiment in near term.
