

Domestic Fundamentals:

- Sideways to weak sentiment noticed at various key market centers in edible oils on Saturday.
- In the annual congregation in edible oil trade (Globe oil Mumbai), analysts have forecasted imports of edible oil by India in 2017/18 is the range of 15-16 MMT, lower rise due to increase in import duty. Higher import duty will lead to higher crushing of oilseeds. However, higher soybean prices will dampen soy meal exports.
Palm oil imports are seen between 9.2-9.7 MMT due to low premium of soy oil over palm oil.
Oilseeds crop in India in 2017/18 is estimated at 33.65 MMT from 35.68 MMT in 2016/17.
On the international front from some analysts are quoting that prices of palm oil will fall below RM 2400-2600 by November-December on weak demand of edible oils in winter.
Dorab Mistry quoted that palm oil will touch RM 3000 if peak stocks will not reach 2.6 MMT.
- Palm oil- Palm oil prices are supported by expectation of firm demand from top importing destinations especially China. Exports of palm oil from Malaysia in first 15 days of September grew 21-23 percent on firm demand from China and Indian subcontinent indicating firm demand from top destination will continue in the September.
Production fell in August in Malaysia despite seasonal uptrend of production and diminishing effect of El Nino. Production fell in August after 20 percent rise in output in July in Malaysia. Going ahead production is not going to show very strong numbers which will lead to slow rise in palm oil end stocks in Malaysia in 2017.
Appreciation of ringgit has not deterred palm oil prices.
China reported surge in imports September. China is buying more ahead of Mid Autumn Festival. CNGOIC has said the China will purchase 450,000 tons of palm oil every month. Surge in Chinese demand has helped RBD palmoilein prices in DALIAN which has supported prices at BMD Malaysia.
India is expected to buy in higher quantities in second half September and October due to stocking ahead of Diwali festival.
Malaysia increase export duty on CPO to counter increase of import duty by India. Malaysia will increase export duty further in coming months to maintain inverted structure of top buyer India.
Rise in crude oil prices will support palm oil prices in near term.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's September 1-15 palm oil exports rose 21.5 percent to 652,350 from 537,022 tons in corresponding period last month. Top buyers are European Union at 122,218 tons (98,118 tons), China at 96,332 tons (57,350 tons) tons, India at 68,000 tons (92,240 tons), Pakistan at 64,800 tons (0.0 tons) and United States at 38,850 tons (14,280 tons). Values in brackets are figures of corresponding period last month.
- According to Malaysia Palm Oil Board (MPOB), Malaysia increased October crude palm oil export duty to at 6.0 percent from 5.5 percent in September. Tax is calculated at reference price of 2,754.18 ringgit (\$657.32) per ton. Tax is calculated above 2,250 ringgit starting from 4.5 percent to a maximum of 8.5 percent.

Outlook: Edible oil basket is expected to feature firm sentiment in near term.
