

Domestic Fundamentals:

- Sideways to weak sentiment featured in various edible oils at various market centers on Saturday.
- Palm oil- Depreciation of ringgit and slow rise of production of palm oil in Malaysia in September may support palm oil prices in near term.
However, expectation of higher end stocks of palm oil in Malaysia on lower exports is expected to underpin palm oil prices in near term.
Whole sentiment is not clear as China is closed.
Exports of palm oil from Malaysia in September rose 10-12 percent on higher buying by China and Pakistan. China was buying on Mid Autumn festival and strong buying by CNGOIC which has said that it will buy 475,000 tons of palm oil every month to refurbish stocks. Port stocks in China are also low.
Malaysia regained some market share in exports to China compared to Indonesia in September.
India is expected to buy in higher quantities in October due to stocking ahead of Diwali festival. However, import of palm oil may weaken on hike of import duties on palm oil. Demand of palm oil in domestic market is firm.
Market is positioning ahead of MPOB data next week. Palm oil on BMD showed rise last week after two weeks of fall.
- Soy oil- Soy oil prices are expected to rise on slowing movement of soybean in US and exports to China due to last 3 hurricanes. Movement of soybean in US has been hampered and quality concerns are there. Harvest of soybean has slowed in US due to rains.
Soy oil share in soybean crush in US reached lows which are expected to support prices in near term.
Soybean crush in US in September rose but below trade estimates will support soy oil prices near term. However, higher crush will not be able to support soy oil stocks as demand of soy oil remains firm in US.
Soybean harvest is progressing at a slower pace in US, below last year and 5 year average. Good to excellent condition of crop was unchanged at 60 percent from previous week. Other parameters of crops are below 5 year average. Soybean yields have been reported to be very good in some areas which may increase the yields of the crop. Argentina is negotiating with US on biodiesel on minimum export prices compared to normal prices and it expects better outcome.
Soybean crop planting has started in Brazil with initial dry conditions and reached 1.5 percent which is below last year pace and 5 year average. Record soybean has been exported from Brazil in last 7 months.
Sentiment will become clear once China opens.
Rise in crude oil prices will support soy oil prices in near term.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's September palm oil exports rose 10.0 percent to 1,384,665 compared to 1,259,240 tons last month. Top buyers are China at 227,764 tons (184,750 tons), European Union at 195,869 tons (248,008 tons), India at 156,675 tons (180,940 tons), Pakistan at 106,540 tons (18,500 tons) and United States at 66,840 tons (49,250 tons). Values in brackets are figures of last month.

Outlook: Edible oil basket is expected to feature firm sentiment in near term.
