

Domestic Fundamentals:

- Mixed sentiment featured in various edible oils at various market centers on Saturday.
- Soy oil- US EPA increased biodiesel production target marginally for 2018. Most of the requirement of soy oil based biodiesel will be met by domestic production of biodiesel after imposing 72 percent anti dumping duty on imports of soy oil based biodiesel from Argentina which out-priced them from US market.

Improving weather in soybean growing area in Argentina has underpinned soybean complex prices.

USDA increased US soybean area forecast in 2018/19 to 91 million acres which is ar record levels and above 2017/18. Soybean planting in Brazil has accelerated and has reached 84 percent which is above last year rate in corresponding period and above 5-year average. Rains in center west and center south have accelerated planting and has provide beneficial moisture to the crop. Planting in Mato Grosso and Parana has reached final stage of completion.

Soybean planting of soybean is expected to fall to 16.8 million hectares from initial estimate of 18.1 million hectares. Soybean planting in Argentina reached 34 percent after rains in soybean growing areas. Initial dry conditions in the country led to slow start of planting.

Soybean harvest has is over in US and it has completed harvest in normal time.

Rise in crude oil prices will support soy oil prices in near term.

Palm oil- Weak exports of palm oil from Malaysia in November, expectation of rise in end stocks of palm oil in Malaysia
in November, expectation of appreciation of Ringgit, expectation of higher than expected production of palm oil in
Malaysia in November will underpin prices in near term.

Ringgit is appreciating and it is on critical support levels and if it breaks these levels then more appreciation is in cards. End stocks of palm oil will rise in Malaysia in November on higher production an weaker exports. However, rise of end stocks will be slower than expected.

Production in Malaysia is slowing but slowdown in production will be staggered in November and December.

Exports of palm oil from Malaysia in November fell 5-8 percent in slowdown of demand from top importing destinations. Exports will slow down on seasonal downtrend of demand.

India purchased lower amount of palm oil in November from Malaysia as it imposed higher import duties of palm oil. Margins in imports and refining is higher in CPO compared to ready to use palmolein has led Indian refiners to shift imports from Indonesia compared to Malaysia. India was the major swing factor in slowdown of exports from Malaysia in November.

• According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's November palm oil exports fell 7.5 percent to 1,311,012 compared to 1,416,664 last month. Top buyers are European Union at 246,561 tons (293,425 tons), China at 236,606 tons (262,811 tons), India at 112,960 tons (175,230 tons), Pakistan at 69,450 tons (82,540 tons) and United States at 69,225 tons (61,772 tons). Values in brackets are of last month.

Outlook: Edible oil basket is expected to feature range –bound to weak sentiment in near term.
