

Domestic Fundamentals:

- Edible oils witnessed mostly weak tone at various market centers on Monday.
- Palm oil-Palm oil prices are underpinned by appreciation of ringgit, expectation of rise in end stocks of palm oil in Malaysia in January, fall in exports of palm oil to top importing destinations and weak competitive oil prices. Production of palm was highest in December in Malaysia since MPOB started processing production information. If production remains at record levels in January despite fall in production in January on seasonal downtrend of production will lead to higher stocks and weaken prices. Ringgit has reached 3.94 per USD after breaking 4.00 per USD. More appreciation is in cards which will underpin palm oil prices. CBOT soy oil and RBD palmolein DALIAN are expected to underpin palm oil prices in near term. Palm oil exports fell 2-7 percent from Malaysia in first 15 days of January indicating weak of tropical oil. However, demand from India and China has been firm in the month but the headline number was weak due to lower buying by EU. Stocks of palm oil in Malaysia is at 2 year highs and if exports fail to pick then more price fall could be seen due to expectation of higher inventory of palm oil in Malaysia. Prices are in a ranged with downward bias.
- Soy oil- Soy oil end stocks in US in December rose on higher production of soy oil due to higher crush of soybean. Crush of soybean was record in December. End stocks of soy oil increased 16 percent. Higher stocks of soy oil in US will underpin soy oil prices in near to medium term. However, USDA reduced soy oil end stocks of US in 2017/18 on higher use despite higher production. Prices of soy oil are underpinned by lower soybean exports from US as reported by USDA and higher soybean quarterly stocks in US as on December 1, 2017. However, demand of soybean from China and weak soybean condition in Argentina could support prices. USDA reduced Argentina soybean crop by 1 MMT to 56 MMT. Brazil is expected to harvest second higher soybean crop whose production was hiked by USDA. Rise in crude oil prices are expected to support soy oil prices. Prices are in a range.
- According to Malaysia Palm Oil Board (MPOB), Malaysia's 2018 production is estimated to grow 3 percent to 20.5 MMT from 19.9 MMT in 2017. Malaysia's 2018 exports are estimated to rise 5.1 percent to 17.4 MMT. MPOB estimates palm oil stocks to fall 15.8 percent to 2.3 MMT.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's January 1-15 palm oil exports rose 2.8 percent to 564,968 tons compared to 581,254 tons in corresponding period last month. Top buyers are European Union at 91,215 tons (156,432 tons), India at 75,880 tons (49,880 tons), United States at 73,788 tons (33,255 tons), China at 39,050 tons (60,188 tons), and Pakistan at 33,500 tons (19,000 tons). Values in brackets are figures of corresponding period last month.

Outlook: Edible oil basket is expected to feature range –bound to weak sentiment in near term.
