

### Domestic Fundamentals:

- Edible oil prices noticed mixed tone at various market centers on Saturday.
- Palm oil- Palm oil prices are expected be underpinned by rise in production of palm oil in Malaysia in March, imposition of export duty on exports of palm oil from Malaysia and fall in competitive oils prices will underpin palm oil prices. Malaysia imposed export duty on crude palm oil starting April after three month suspension export duty to reduce palm oil stocks in the country. This step will lead price sensitive buyers to buy more in rest of March. Post March buyers will shift to lower priced Indonesian crude palm oil shipments. Production of palm oil is expected to rise in March as seasonal downtrend of production diminishes. Production of palm oil in first 20 days of March rose, according to MPOA data. Exports from Malaysia is expected to fall from April as buyers will move from Malaysia to Indonesia on imposition of import duty after higher exports in March before export duty kicks in. Exports of palm oil from Malaysia in first 20 days of March rose 13-15 percent on higher buying by India and EU. India is top buyer in March despite hike in import duty on palm oil on March 1. Demand is expected to rise from top importing destination ahead of holy month of Ramadan in May whose stocking usually starts one to two months before. However, expectation of slow fall in stocks of palm oil in Malaysia, rise in production of palm oil in Malaysia in March and fall in competitive oils will weigh on prices. Fall in competitive oils like CBOT soy oil and DALIAN RBD palmolein due to trade war between US and China will affect palm oil prices adversely.
- Soy oil- Soy oil prices are underpinned by weak demand in India, rise in end stocks of soy oil in US, pickup in harvest of soybean in Brazil, market selloff on trade war of US with China and firm dollar. Demand of soy oil has weakened in India as Holi festival is over and rise in prices of soy oil in 2018 bites into demand especially when rapeseed oil and sunflower oil trades at slight premium. Soy oil stocks rose in US in March as reported by NOPA on higher crush of soybean and slowdown of demand. There have been rains in many parts of Argentina which is expected to limit losses. More rains are forecasted in the weekend. Harvest has picked up in Brazil and is expected to accelerate as he harvesting progresses. Harvest is progressing above 5-year average as the country expects to harvest record crop in 2017/18. Markets are worried by escalation of trade war between US and China which could spillover to soybean complex prices.
- According to Malaysian government, Malaysia imposed export duty on palm oil for April at 5 percent after three month suspension of export duty. Export duty of palm oil is calculated at reference price of 2,474.63 ringgit (\$633.38) per ton. Tax is calculated above 2,250 ringgit starting from 4.5 percent to a maximum of 8.5 percent.

**Outlook:** Edible oil basket is expected to feature range –bound to weak sentiment in near term.
