

Domestic Fundamentals:

- Edible oil prices featured mostly firm trend at various markets on Saturday.
- Soy oil- Surprise fall in forecast of soybean planting area in US will support soybean complex prices in medium term. This is the first time since 1983 when US farmers are planting soybean above corn. Area under soybean and corn has reduced. Area has shifted towards wheat and cotton. Area came below trade estimates.

Soybean stocks on March 1 came above market expectations and was 21 percent above last year stocks.

Soy oil demand is weak demand in India as demand has failed to pickup after Holi and higher prices of soy oil due to hike in import duty bites especially when rapeseed oil and sunflower oil trades at slight premium.

Soy oil stocks rose in US in February as reported by NOPA on higher crush of soybean and slowdown of demand.

Harvest of soybean in Brazil has reached 71 percent compared to 74 percent in corresponding period last year and 69 percent 5-year average. Harvest is progressing at good pace and is expected to be completed in normal time.

Forecasters are cutting Argentina soybean crop with Buenos Aires Grains Exchange and Rabobank reduces soybean crop estimate for 2017/18 below 40 MMT due to drought conditions in the country.

Markets are worried by escalation of trade war between US and China which could spillover to soybean complex prices. China has stated that proposal of tariffs on soybean from US is on table. Prices are in a range.

- Palm oil- Palm oil prices are falling on expectation of slow fall in end stocks of palm oil in Malaysia, rise in production of palm oil in Malaysia in March, imposition of export duty on exports of palm oil from Malaysia, firm ringgit and fall in competitive oils prices will underpin palm oil prices.
 - Ringgit has started appreciating and has broken 3.88 levels on higher crude oil prices and weakness in Dollar Index. There is expectation in market that palm oil stocks in Malaysia will show slow fall in coming months due to rise in production of palm oil and slow rise in imports.

Production of palm oil is expected to rise in March in Malaysia as seasonal downtrend of production diminishes.

Malaysia imposed export duty on crude palm oil starting April after three month suspension export duty to reduce palm oil stocks in the county. This step will lead price sensitive buyers to buy more in rest of March. Post March buyers will shift to lower priced Indonesian crude palm oil shipments.

Exports from Malaysia is expected to fall from April as buyers will move from Malaysia to Indonesia on imposition of import duty after higher exports in March before export duty kicks in.

India was swing buyer of palm oil in Malaysia in March whose imports rose despite hike in import duty on March 1.

 According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's March 1-25 palm oil exports rose 10.6 percent to 1,190,261 tons compared to 1,076,563 tons in corresponding period last month. Top buyers are India at 313,233 tons (221,115 tons), European Union at 234,268 tons (305,721) tons, China at 106,864 tons (66,670 tons), Pakistan at 58,395 tons (27,000 tons) and United States at 42,575 tons (72,290 tons). Values in brackets are figures of corresponding period last month.

Outlook: Edible oil basket is expected to feature range -bound to firm sentiment in near term.
