AGRIWATCH

#### **Domestic Fundamentals:**

- Edible oil prices featured mostly sideways to firm trend at various markets on Tuesday.
- Palm oil- Palm oil prices are expected to rise on rise in exports of palm oil from Malaysia in March, firm competitive oils and rise in crude oil prices.

Palm oil exports from Malaysia in March showed very strong numbers on exceptionally higher imports from India. India remained the swing importer in March. Higher imports from India were due to expiry of suspension of export duty by Malaysia. India is prices sensitive country and is taking advantage of lower duty. Moreover, port stocks in India are running low which has supported imports. India was swing buyer of palm oil in Malaysia in March whose imports rose despite hike in import duty on March 1.

Further, imports from top importing destinations are expected to rise on lower prices of palm oil and demand ahead of Ramadan which will start from mid May.

However, expectation of slow fall in end stocks of palm oil in Malaysia, rise in production of palm oil in Malaysia in March, imposition of export duty on exports of palm oil from Malaysia, firm ringgit and fall in competitive oils prices may underpin palm oil prices.

Exports from Malaysia is expected to fall from April as buyers will move from Malaysia to Indonesia on imposition of import duty after higher exports in March before export duty kicks in.

• Soy oil- Surprise fall in forecast of soybean planting area in US will support soybean complex prices in medium term. This is the first time since 1983 when US farmers are planting soybean above corn. Area under soybean and corn has reduced. Area has shifted towards wheat and cotton. Area came below trade estimates.

Soybean stocks on March 1 came above market expectations and was 21 percent above last year stocks.

Soy oil demand is weak in India as demand has failed to pickup after Holi and higher prices of soy oil due to hike in import duty bites especially when rapeseed oil and sunflower oil trades at slight premium.

Soy oil stocks rose in US in February as reported by NOPA on higher crush of soybean and slowdown of demand. Harvest of soybean in Brazil has reached 71 percent compared to 74 percent in corresponding period last year and 69

percent 5-year average. Harvest is progressing at good pace and is expected to be completed in normal time.

Forecasters are cutting Argentina soybean crop with Buenos Aires Grains Exchange and Rabobank reduced soybean crop estimate for 2017/18 below 40 MMT due to drought conditions in the country.

Markets are worried by escalation of trade war between US and China which could spillover to soybean complex prices. China has stated that proposal of tariffs on soybean from US is on table. Prices are in a range.

According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's March palm oil exports rose 19.4 percent to 1,394,973 tons compared to 1,167,908 tons last month. Top buyers are India at 412,783 tons (231,115 tons), European Union at 261,868 tons (306,371) tons, China at 122,364 tons (66,670 tons), Pakistan at 58,395 tons (27,000 tons) and United States at 53,175 tons (74,790 tons). Values in brackets are figures of last month.

Outlook: Edible oil basket is expected to feature range –bound to firm sentiment in near term.
