

**Domestic Fundamentals:**

- Edible oil prices witnessed mostly sideways to weak tone at various markets on Saturday.
- Palm oil- Malaysia extended suspension of export duty on palm oil by one month to end April. This step is being taken to clear extra stocks of palm oil. This step will support palm oil prices.  
Palm oil prices are expected to rise on expectation of fall in stocks of palm oil in coming months, rise in exports of palm oil from Malaysia in April, trade war between US and China.  
Palm oil stocks are expected to fall in Malaysia in coming months on higher exports and fall in production.  
Palm oil exports have good March and are expected to show good April and May on higher demand ahead of Ramadan.  
Palm oil production will show sharp rise in March but will not rise in April as it will be very high March. Production in May and June in Malaysia will be affected by holidays of Ramadan.  
Palm oil exports from Malaysia in March showed very strong numbers on exceptionally higher imports from India. India remained the swing importer in March. Higher imports from India were due to expiry of suspension of export duty by Malaysia. Imports from India rose despite hike in import duty on March 1.  
Trade war between US and China is expected to support palm oil prices as prices of soy oil in China will rise due to imports of higher priced South American soybean. China imposed 25 percent import duty on US soybean. Palm oil prices have suffered in last quarter in China due to lower prices of soy oil.
- Soy oil- Soy oil prices are expected to be supported by escalation of trade war between US and China. China imposed 25 percent import duty on US soybean. India buys most of soy oil from Argentina and South America is short of soybean as drought in Argentina has crippled supply. Soybean prices from South America will rise on hike in duty.  
Surprise fall in forecast of soybean planting area in US will support soybean complex prices in medium term. This is the first time since 1983 when US farmers are planting soybean above corn. Area under soybean and corn has reduced. Area has shifted towards wheat and cotton. Area came below trade estimates.  
Soy oil demand is weak in India as demand has failed to pickup after Holi and higher prices of soy oil due to hike in import duty on palm oil bites especially when rapeseed oil and sunflower oil trades at slight premium.  
Soy oil stocks rose in US in February as reported by NOPA on higher crush of soybean and slowdown of demand.  
Harvest in Brazil is progressing at good pace and is expected to be completed in normal time.  
Forecasters are cutting Argentina soybean crop with Buenos Aires Grains Exchange reduced soybean crop estimate for 2017/18 below 38 MMT due to drought conditions in the country.  
Rise in crude oil prices are expected to support soy oil prices. Prices are in a range.
- Malaysian government extended suspension of export duty in by one month to end April. Export duty will cease if palm oil inventory fall below 1.6 MMT. This step will help clear extra inventory of palm oil in coming months.

**Outlook:** Edible oil basket is expected to feature range –bound to firm sentiment in near term.
