

**Domestic Fundamentals:**

- Edible oil prices witnessed mixed tone at various markets centers on Saturday.
- Palm oil- Palm oil prices are expected to be supported by recovery in exports of palm oil from Malaysia in July, depreciation of Ringgit, renewed demand of palm oil at lower levels and technical rebound.
Palm oil exports rose 3.3 percent in first 20 days July on pickup of exports of palm oil to India. Exports rose to India due to bargain buying by India, restocking of palm oil after two months of weak imports of palm oil by India, rise in import demand due to return of parity in imports of palm oil.
Ringgit has depreciated below 4/\$ and is trading at 4.06 levels. With the expectation rise in Dollar Index on aggressive hike in interest rate by US FED has led to expectation of further fall in Ringgit. Lower ringgit will support palm oil exports as lower ringgit makes palm oil more competitive compared to competitive oils.
Demand is expected to pickup in coming days as prices of palm oil has fallen to levels which becomes lucrative for buyers like China and India. Both the countries are price sensitive markets which prefer bargain buying.
Palm oil is expected to show technical rebound as it became oversold and was ripe for technical rebound.
Competitive oil like soy oil CBOT and RBD palmolein DALIAN is expected to rebound due to technical rebound as both are in oversold zone. Soy oil is expected to fall of lower soy oil stocks in US. RBD palmolein DALIAN is expected to rise on expectation of rise in demand of palm oil from China due to weak supply of soy oil in the country.
Expectation of rise in end stocks of palm oil in Malaysia in July due to rise in production of palm oil in Malaysia in July will be drag for palm oil prices in coming days.
Rise in crude oil prices are expected to support palm oil prices.
- Soy oil- Soy oil prices are expected to be supported by lower than expected soy oil stocks in US as reported by NOPA. Stocks of soy oil fell 4.85 percent despite higher crush of soybean.
Soybean crop condition in US is better than corresponding period last year and 5-yr average. However, there is some apprehension on soybean crop condition as soybean needs more showers in key US states.
Soy oil demand is expected to pickup as it has corrected and it will generate fresh demand at lower levels.
Depreciation of Rupee will support soy oil prices in India as prices will adjust higher due to depreciation of Rupee.
Firm dollar on aggressive FED interest rate hike will be drag on soy oil prices.
Rise in crude oil prices are expected support soy oil prices. Prices are in range.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's July 1-20 palm oil exports rose 3.3 percent to 692,334 tons compared to 670,442 tons in corresponding period last month. Top buyers are European Union at 151,961 tons (156,770 tons), India at 91,300 tons (69,300 tons), China at 63,125 tons (101,000 tons), United States at 27,248 tons (41,440 tons) and Pakistan at 11,000 tons (52,600 tons). Values in brackets are figures of corresponding period last month.
- According to cargo surveyor AmSpec Agri, Malaysia's July 1-20 palm oil exports fell 1.3 percent to 681,178 tons compared to 690,015 tons in corresponding period last month.

Outlook: Edible oil basket is expected to feature range –bound to firm sentiment in near term.
