Dec 21, 2018

#### **Domestic Fundamentals:**

- Edible oils featured mixed tone in various market centers on Thursday.
- Domestic soy oil futures and palm oil futures fell on fall in international markets. International palm oil and soy oil
  futures fell on oversupply concerns. Rupee appreciated above 70/USD as US FED cut its projection of future hike of
  interest rates. Crude oil prices were trading lower on Thursday.
- Palm oil- Palm oil prices are expected to be supported by expectation of fall in production of palm oil in coming months, rise in exports of palm oil from Malaysia and weak ringgit.

However, record palm oil stocks in Malaysia and Indonesia will weigh on prices.

Palm oil production is expected to fall on seasonal downtrend of production. Production fell in November in Malaysia indicating that production has peaked and is expected to fall going ahead.

Production of palm oil is estimated to have fallen in Indonesia indicating peak of palm oil production has reached.

Exports of palm oil rose in December on higher demand from China and India.

China is buying more palm oil due to lower production of soy oil in China due to lower imports of soybean in November. China imported fewer soybeans due to outbreak of swine flu in the country and negative crush margins of soybean. This has led to lower supply of soy oil leading to higher imports of palm oil.

Further, China will import more in Dec and Jan on demand ahead of Chinese New Year.

India is buying to take advantage of low prices of palm oil.

• Soy oil- Soy oil prices are underpinned by record crop in Brazil, near record crop in US and lower demand of soybean from China. Trade settlement by US and China will have limited impact on soybean complex as despite Chinese demand, stocks of soybean will stay firm in US. However, rise in competitive oils like palm oil prices will support its prices.

Brazil crop condition is good and harvest is expected to start and it is expected to harvest record crop due to higher yield and record area.

US is sitting on record soybean stocks as demand from China is expected to be limited in coming months as Brazil soybean supply will start and US will not be able to liquidate major stocks to China.

Soybean demand from China is expected to remain low due to lowering of protein requirement by China in feed industry and measures to block exports of soy meal coupled with measures to diversify away from soybean as a major protein source by China.

- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's Dec 1-20 palm oil exports rose 6.9 percent to 879,491 tons compared to 822,620 tons in the corresponding period last month. Top buyers were China at 255,010 tons (136,710 tons), India at 175,910 tons (120,700 tons), European Union 137,294 tons (176,913 tons), United States at 64,405 tons (36,329 tons) and Pakistan at 35,500 tons (15,000 tons). Values in brackets are figures of corresponding period last month.
- According to cargo surveyor Intertek Testing Services (ITS), Malaysia's Dec 1-20 palm oil exports rose 2.9 percent to 808,061 tons compared to 785,493 tons in corresponding period last month. Top buyers were India & subcontinent 249,210 tons (150,000 tons), China at 212,810 tons (103,650 tons) and European Union 113,097 tons (196,073 tons). Values in brackets are figures of corresponding period last month.

Outlook: Edible oil basket is expected to feature range –bound to firm sentiment in near term.
