

## **Domestic Fundamentals:**

- Ref. Soy oil prices featured firm tone at most of the centers amid good retailers demand ahead of Holi festivals.
   Groundnut oils prices traded steady to downside on poor local demand due to higher prevailing prices. While, higher stock pushed down palm oil prices.
- Domestic soy oil future and CBOT soy oil rose on good buying activities however palm oil futures & BMD CPO declined today on ample stocks. Crude oil prices reported lower side Wednesday.
- According to Malaysia Palm Oil Board (MPOB), Malaysia's February palm oil stocks rose 1.34 percent to 30.46 lakh tons compared to 30.05 lakh tons in January 2019. Production of palm oil in Feb fell 11.10 percent to 15.45 lakh tons compared to 17.37 lakh tons in Jan 2019. Exports of palm oil in Feb fell 21.38 percent to 13.21 lakh tons compared to 16.81 lakh tons in Jan 2019. Imports of palm oil in Feb rose 15.71 percent to 0.94 lakh tons compared to 0.82 lakh tons in Jan 2019. End stocks of palm oil unexpectedly rose against trade expectation on fall in end stocks. Rise in end stocks was primarily due to fall in exports.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's Mar 1-10 palm oil exports rose 5.0 percent to 412,253 tons compared to 392,484 tons in corresponding period last month. Top buyers were European Union 82,440 tons (38,686 tons), China at 71,950 tons (60,445 tons), India at 45,200 tons (156,770 tons), Pakistan at 22,000 tons (22,250 tons) and United States at 18,240 tons (20,430 tons). Values in brackets are figures of corresponding period last month.
- Palm oil prices are underpinned by rise in end stocks of palm oil, weak demand of palm oil from Malaysia and firm ringgit.
  - Palm oil stocks unexpectedly rose 1.3 percent in Feb on lower exports of palm oil amid big fall in production of palm oil. Palm oil exports in February from Malaysia due to weak demand from EU and China. Palm oil production slowed in Feb indicating that palm oil output in Malaysia is falling on seasonal downtrend of production and is expected remain weak from coming months.
  - Palm oil exports from Malaysia rose in March due to firm demand from top importing destinations. Demand of palm oil from China is expected to remain weak as demand of palm oil generally weakens from the country after Chinese New year and US-China trade optimism which indicates that China will buy major amounts of soybean to replace palm oil by soy oil. Imports from China will remain weak for next couple of months.
  - India is buying RBD palmolein from Malaysia in Mar in higher quantities due to lower import duty offered to Malaysia by India. Further, low port stocks of RBD palmolein and improvement in import parity will lead to higher imports in coming months.
  - With higher exports and lower production will cut palm oil stocks in Malaysia in March thereby supporting prices.
- International soy oil prices are supported by lower end stocks of soy oil and soybean in US, US-China trade settlement optimism, higher demand of US soybean by China and firm crude oil prices.
  - Trade talks are going on between US and China and major announcement is expected any day. Both sides have expressed satisfaction in talks. With extension of expiry of imposition of import duty by US on Chinese products indicate that talks are expected to continue longer than expected.
  - Soy oil and soybean end stocks of US was cut by USDA. Soybean end stocks was cut due to higher crush while soy oil end stocks was cut due to higher demand from biodiesel partially set off by higher production.

Outlook: Edible oil basket is expected to feature range -bound to weak sentiment in near term.
