

Domestic Fundamentals:

- Edible oils complex showed mixed trend at various markets on Saturday.
- Soy oil closed in weak zone while Palm oil domestic future prices firmed up on improved demand prospects. CBOT Soyoil closed on higher side on buyers' interests on buying activities however BMD CPO prices were trading lower on Friday.
- Palm oil prices are expected to firm up on higher exports of Palm oil from Malaysia. Depreciation of Ringgit and rise in crude oil prices will also support Palm oil prices to rise.
However, Palm oil production fell slowly in Malaysia in April as continued elevated production continued in April in Malaysia. Production is expected to fall for next two months and thereafter rise for rest of 2019.
Palm oil exports rose from Malaysia in May due to firm demand from India and China. However, rise was lower than expected. However, palm oil exports in first 15 days of May reported higher exports due to strong demand from India and EU while demand from China weakened in May.
Palm oil exports to India rose due to lower import duty differential between CPO and RBD palmolein especially from Malaysia, positive refining margins and demand at lower levels.
China is purchased 1 palm oil as it is importing lower amount of soybean due to swine flu and diversification of protein sources in the country. This has led to lower supply of soy oil leading to higher imports of palm oil.
Ringgit has depreciated below 4.17/USD leading to higher demand of palm oil compared to competitive oils.
Rise in crude oil due to OPEC supply cuts is expected to support palm oil prices.
- According to Malaysia Palm Oil Board (MPOB), Malaysia's April palm oil stocks fell 6.62 percent to 27.30 lakh tons compared to 29.23 lakh tons in March 2019. Production of palm oil in April fell 1.36 percent to 16.49 lakh tons compared to 16.72 lakh tons in March 2019. Exports of palm oil in April rose 2.02 percent to 16.51 lakh tons compared to 16.18 lakh tons in March 2019. Imports of palm oil in Apr fell 52.67 percent to 1.62 lakh tons compared to 1.31 lakh tons in March 2019. End stocks of palm oil fell less than trade expectation on slower fall in production. Fall in end stocks was primarily due to rise in exports and higher Malaysia's domestic use.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's May 1-15 palm oil exports rose 4 percent to 773,917 tons compared to 744,188 tons in corresponding period last month. Top buyers were European Union 176,310 tons (142,135 tons), India at 202,466 tons (165,870 tons), United States at 103,620 tons (23,316 tons), China at 65,670 tons (109,425 tons) and Pakistan at 30,800 tons (8,000 tons) and. Values in brackets are figures of corresponding period last month.
- According to cargo surveyor Intertek Testing Services (ITS), Malaysia's May 1-15 palm oil exports rose 15 percent to 786,576 tons compared to 684,190 tons in corresponding period last month. Top buyers were European Union 197,795 tons (103,385 tons), India & subcontinent 238,016 tons (202,870 tons) and China at 58,070 tons (116,825 tons). Values in brackets are figures in corresponding period of last month.

Outlook: Edible oil basket is expected to feature range –bound to firm sentiment in near term.
