

Domestic Fundamentals:

- Edible oils complex featured steady to weak trend in various oils at various market centers on Monday.
- Soy oil and palm oil domestic futures fell on demand concerns. BMD CPO rose on firm global demand scenario while CBOT soy rose on technical buying. Crude oil was trading higher on Friday.
- Palm oil prices are expected to be supported by expectation of fall in end stocks of palm oil in Malaysia in Aug, rise in exports of palm oil, slow rise in production of palm oil, rise in competitive oils and rise in crude oil prices.
 - Palm oil end stocks are expected to fall in Malaysia in August on slowdown of production in Malaysia and rise in exports from Malaysia in August.
 - Production of palm oil is expected to slowdown in August after it rose 15 percent in July in Malaysia. Data from Malaysian Palm Oil Association showed slowdown of production of palm oil in first 20 days of August indicating that production will close the month of August with deficit.
 - Exports of palm oil rose from Malaysia in August on higher exports to China and India.
 - Exports of palm oil from Malaysia to India slowed in Aug due to rise in prices of palm oil, negative refining margins and high stocks of palm oil at Indian ports. However, palm oil imports are expected to remain firm in Aug and onwards on firm demand due to festive season and seasonal uptrend of demand.
 - Exports of palm oil is expected to rise to China on US-China trade dispute, removal of import quota of palm oil imports by the country and lower supply of soy oil the country due to lower imports of soybean in 2019 due to swine flu.
- In a landmark decision Government of India (GOI) increased import duty on imports of RBD palmolein sourced from Malaysia by 5 percent under India-Malaysia Comprehensive Economic Cooperation Agreement. This step will curb surging imports of RBD palmolein from Malaysia which hampered local refining of palm oil. This step will give rise to higher CPO imports and lower RBD palmolein imports due to rise in differential between CPO and RBD palmolein imports from 5.5 percent to 11 percent. This step will also support Indonesia refiners who were struggling due to lower duty preference given to Malaysia. Secular duties are always preferable when dealing with equivalent trade partners. Further, this step will stem the rapid fall of palm oil stocks in Malaysia due to surge in imports by India. Malaysia being a benchmark market of palm oil, any fall in stocks in that country leads to rise in global palm oil prices.
- According to Ministry of Finance (MOF), Government of India Notification number 29/2019-Customs dated 4th September 2019, India increased import duty on RBD palmolein imports by 5% sourced from Malaysia for a period of 180 days imported under India-Malaysia Comprehensive Economic Cooperation Agreement. After the hike import duty on imports of RBD palmolein from Malaysia stands at 50 percent plus 10 percent cess which makes effective duty at 55 percent. This brings import duty on Malaysian RBD Palmolein at par with other destinations and import duty differential between CPO and RBD palmolein imports stands at 11 percent.
 - This hike in import duty has been done as imports of RBD palmolein surged from Malaysia in 2019 hurting Indian refining industry. Lower price imports led to idling of plants add domestic refining industry was not able to increase production despite significant capacities. Further, the market share of Indian refined RBD palmolein decreased significantly compared to imported RBD palmolein from Malaysia. The ministry quoted that any delay in imposing import duty will cause irreparable damage to the industry.

Outlook: Edible oil basket is expected to feature sideways to weak tone in near term.
