

**Domestic Fundamentals:**

- Edible oils complex featured mixed trends on Monday.
- Soy oil domestic futures rose on demand concerns Palm oil domestic futures rose on rise in international benchmark. BMD CPO rose on buying at lower levels. CBOT soy oil fell on technical selling.
- Palm oil prices are expected to be supported by expectation of fall in stocks of palm oil in coming months, slow rise in palm oil production in coming months, rise in exports of palm oil from Malaysia and Indonesia in coming months, and rise in competing oils.  
Palm oil end stock are expected to fall in Malaysia on slowdown of production of palm oil and rise in exports of palm oil from Malaysia.  
Palm oil production is expected to rise in Malaysia in coming months but at a slower rate on seasonal uptrend of production.  
Palm oil exports are expected to rise on firm demand from India and China.  
Palm oil imports by India is expected to rise on firm imports due to seasonal uptrend of demand, festive demand , positive refining margins and lower crop of oilseeds in the country. However, high stocks at ports will slow demand.  
Imports by China is expected to remain firm on seasonal uptrend of demand and removal of import quota by the country.
- Soy oil international domestic prices are expected to be supported by demand ahead of festivals and lower crop of soybean in the country. However, negative import parity and negative refining margins and high stocks at India ports will cap gains.
- Soy oil international prices are expected to be supported by fresh buying of soybean by China from US, low stocks of soy oil in US, lower soybean crop in US and firm demand by China. However, higher soybean crop in South America will cap gains.
- China has purchased fresh consignments of US soybean in this week to tone down trade tensions between both countries ahead of US and China trade talks. This has taken pressure off Chinese diplomats ahead if trade talks set to take place in near term.
- Soybean harvest has started and be below last year and 5-year average. Crop condition has improved in last few weeks. However, soybean crop is expected to be weakest in years which will decrease production of soy oil in world supporting prices.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's Sep palm oil exports fell 20.1 percent to 1,327,566 tons compared from 1,661,984 tons last month. Top buyers were European Union 285,830 tons (274,919 tons), India at 257,980 tons (498,080 tons), China at 224,770 tons (347,253 tons), United States at 57,862 tons (56,788 tons) and Pakistan at 43,870 tons (41,000 tons). Values in brackets are figures of last month.
- The newly planted US soybean is 55% soybean dropping leaves which is down from 81% in corresponding period last year and 5-year average of 76%. About 7% soybean has been harvested compared to 22% in corresponding period last year and 5-year average of 20%. Good to excellent condition at 54% compared to 68% in corresponding period last year reported in the US crop progress report dated 29 September 2019 by United States Department of Agriculture (USDA).

**Outlook:** Edible oil basket is expected to feature sideways to weak tone in near term.
