### Veg. Oil Daily Fundamental Report 27<sup>th</sup> Feb 2020

#### **Domestic Fundamentals:**

- Edible oil complex featured mostly weak tone in various markets centers on Wednesday.
- Soy oil domestic futures fell on fall in international benchmarks. BMD CPO fell on weak global demand prospects and rising global supply while CBOT soy oil prices fell on coronavirus worries and weak global demand worries.
- Palm oil prices are expected to be underpinned by expectation of rise in end stocks of palm oil in Malaysia, fall in exports of palm oil from Malaysia, weak Indian demand and fall in competing oils.
  - Palm oil end stocks in Malaysia are expected to rise after steep fall noted in Jan. Stocks of palm oil in Malaysia are expected to rise on improvement in prosecution of palm oil and slowdown of exports from Malaysia.
  - Palm oil production in Malaysia is expected to rise on seasonal uptrend of production and exit from weak production cycle.

Palm oil showed surprise rise in Feb from Malaysia on demand from EU other destinations. Demand from India has collapsed and Chinese demand has slowed due to outbreak of coronavirus. However, palm oil exports from Malaysia is going to slow due to weak demand from China.

However, higher use of palm oil in biodiesel in Malaysia and Indonesia is expected to limit losses.

Imports from India is expected to remain benign due India placing RBD palmolein imports to restricted list. Higher export duty on CPO by Malaysia will slow CPO demand from India. Further, Indian government advisory to importers to slow purchase from Malaysia will slow exports of CPO from Malaysia.

However, exports of palm oil from Malaysia and Indonesia may rise on steep fall in prices if palm oil in last one month. Stocks of palm oil is expected to fall in Indonesia in coming months due to seasonally weak production and surge in use of biodiesel.

Further, higher use of biodiesel in Malaysia is expected to stimulate demand in coming months.

Ringgit has depreciated below 4.15 USD thereby making palm oil competitive compared to competing oils. Further, palm oil prices may be supported by rise in prices of crude oil.

- Soy oil international prices are expected to stay weak due to spread of coronavirus globally, weak demand of soybean from China, rise in stocks of soy oil in US and higher production of soybean in Brazil and Argentina. Soybean demand from China is uncertain in coming days given the condition of coronavirus. Demand of meat products has collapsed due that slowing demand of soy products and due to lower swine count caused by swine flu in 2109.
  - Soy oil stocks rose in US in Jan on rise in crush of soybean and lower domestic disappearance. Lower domestic disappearance is due to weak biodiesel demand in the country despite higher Food, Feed and Industrial use.
  - Bumper soybean crop in Brazil due to record planted area and yields due to good growing conditions.
  - Soybean crop in Argentina is in good condition and yields are expected to be higher.
- According to cargo surveyor Societe Generale de Surveillance (SGS), Malaysia's Feb 1-25 palm oil exports fell 4.4 percent to 970,094 tons compared to 1,015,226 tons in corresponding period last month. Top buyers were European Union 214,626 tons (282,126 tons), China at 173,250 tons (140,860 tons), United States at 80,345 tons (58,485 tons), Pakistan at 30,820 tons (116,500 tons) and India at 25,269 tons (25,269 tons). Values in brackets are figures of corresponding period last month.

Outlook: Edible oil basket is expected to feature sideways to weak tone in near term.
