

Domestic Fundamentals:

- Edible oil complex featured mostly weak trend in various markets centers on Saturday.
- Soy oil and palm oil domestic markets were closed on occasion of Labor Day in India. BMD CPO was closed on eve of Labor Day. CBOT soy oil rose on rise in crude oil prices. Rise in crude oil prices will support edible oils prices.
- According to Indonesia trade ministry, Indonesia will not charge export duty on crude palm oil for May. Reference prices of April was set at USD 635.15 per ton below threshold price of USD 750 per ton. Export duty on CPO was brought down to zero ton in April due to fall in threshold price of USD 750 per ton.
- According to cargo surveyor Intertek Testing Services (ITS), Malaysia's April palm oil exports rose 3.8 percent to 1,174,285 tons compared to 1,131,283 tons last month. Top buyers were European Union 375,350 tons (381,956 tons), China at 207,530 tons (189,740 tons) and India & subcontinent 87,250 tons (71,150 tons). Values in brackets are figures of last month.
- Soy oil domestic prices are expected to be supported by weak supply due to lower supply of Indian crushed soy oil as soybean is crushed in less quantity due to weak demand of soy meal on weak poultry demand. Further, supply bottlenecks faced on Indian ports due to congestion, raw material shortage, labor shortage, packaging material shortage has led to refiners to run at 40-50% of their capacity. Further, there is shortage of trucks and trucks are facing problems in transit due to lockdown.
- Soy oil international prices are expected to be supported by rise in crude oil prices, rise in import demand of soybean from China, fall in stocks of soy oil in US and lower soybean crop in Argentina and Brazil. However, adverse effect of coronavirus will underpin gains.
- Crude oil prices surged this week due to lower rise in inventory in US supporting soy oil prices as soy oil competes with crude in biodiesel. China placed major orders of soybean from US this week. However, US has said that it will impose more duties on Chinese goods to punish China on its role in coronavirus spread. If US goes ahead and imposes higher trade duties on China than soybean exports from US will suffer and will underpin soybean complex prices.
- Palm oil international prices are expected to be underpinned by expectation of rise in stocks of palm oil in Malaysia, rise in production of palm oil from Malaysia, lower use of palm oil in biodiesel in Indonesia and fall in crude oil prices. Palm oil end stocks are expected to rise in Malaysia in April due higher production amid firm exports. Production of palm oil will firm in Malaysia in April due to seasonal uptrend of production. MPOA reported 25 percent higher production of palm oil in Malaysia in April. This may lead to higher stocks despite higher exports from Malaysia. Palm oil exports are expected to remain firm from Malaysia in April-May due to firm demand from India and China. However, closure of half of the world due to coronavirus leading to lower consumption of palm oil which is mostly consumed outside house. Palm oil imports from India is expected to remain weak from India due to lower consumption as palm oil is mostly consumed in street food, joints and restaurant chains. And due to lockdown of India the consumption of these food are not there. Further, due to supply chain disruption in India due to port problems, raw material shortage, labor shortage, packaging material shortage and shortage of trucks. Moreover, transit problems faced by trucks are slowing down transport of products.

Outlook: Edible oil basket is expected to feature sideways to weak tone in near term.
