Veg. Oil Daily Fundamental Report 22nd May 2020

Domestic Fundamentals:

- Edible oil complex featured mixed trend in various markets centers on Thursday.
- Soy oil and palm oil domestic prices rose on rise in international benchmarks. BMD CPO rose on higher global demand prospects and fresh demand from India. CBOT soy oil rose on rise in crude oil prices.
- Soy oil international prices are supported by demand at lower levels, firm demand of soybean from China, rise in crude
 oil prices and lower crop of soybean in South America. However, higher soy oil stocks of in US as reported by NOPA will
 cap gains in prices.
- Rapeseed oil domestic market is supported by firm demand. Supply has been totally restored. Demand is high due to perceived property of high immunity. Demand may slow due to rise in prices during lockdown.
- Sunflower oil domestic market is supported by firm demand. Import demand of sunflower oil will slow due to negative import parity and negative margins. Demand may slow due to rise in its prices during lockdown.
- Palm oil international prices are expected to be supported by demand at lower levels, rise in exports of palm oil from Malaysia, slow rise in production of palm oil in Malaysia, Indonesia keeping it biodiesel policy intact, Malaysia reducing crude palm oil export duty to zero, depreciation of ringgit and rise in crude oil prices.
- According to cargo surveyor Intertek Testing Services (ITS), Malaysia's May 1-20 palm oil exports rose 11.6 percent to 772,145 tons compared to 691,910 tons in corresponding period last month. Top buyers were China at 144,715 tons (91,420 tons), European Union 199,245 tons (180,880 tons), and India & subcontinent 99,400 tons (87,250 tons). Values in brackets are figures of corresponding period last month.
- Indonesia increased palm oil export levy by USD 5 per ton to finance it B30 biodiesel mandate. Indonesia is going to
 distribute USD 187 million for its B30 program. Indonesia Estate Fund has not got enough funds to fund program after
 2020. This fund subsidizes producers of biodiesel with subsidies to fund gap between diesel fuel and biodiesel. Indonesia
 ambitious biodiesel mandate intends to reduce crude oil imports by increasing consumption of surplus palm oil
 production. Indonesia currently collects USD 50 per ton export levy on exports of crude palm oil if prices rise above USD
 619 per ton.
- Indonesia increased palm oil export levy by USD 5 per ton to finance it B30 biodiesel mandate. Indonesia is going to distribute USD 187 million for its B30 program. Indonesia Estate Fund has not got enough funds to fund program after 2020. This fund subsidizes producers of biodiesel with subsidies to fund gap between diesel fuel and biodiesel. Indonesia ambitious biodiesel mandate intends to reduce crude oil imports by increasing consumption of surplus palm oil production. Indonesia currently collects USD 50 per ton export levy on exports of crude palm oil if prices rise above USD 619 per ton.
- India has contracted to purchase 2-3 lakh tons of crude palm oil (CPO) from Malaysia for June and July delivery. This comes after Malaysia reduced its CPO palm oil export duty to zero and India restricting refined palm oil imports by cancelling all the 29 licenses. India and Malaysia relations were strained for last some months when Malaysia raised Kashmir issue at UN. This led Indian government to restrict refined palm oil imports and advising importers not to purchase from Malaysia. In recent times Malaysia has purchased sugar, rice and buffalo meat in bulk from India to decrease tensions between both countries. Malaysian Prime Minister Mahatir Mohammad was ousted from power in March and since then new regime has vowed to reverse the policy of Mahatir Mohammad to reduced tensions.

Outlook: Edible oil basket is expected to feature sideways to firm tone in near term.
