

Domestic Fundamentals:

Edible oil basket showed steady sentiments at various market places. Palm oil, Soy oil and Groundnut oil, sunflower oil and Mustard oil prices traded sideways at various markets.

Global crude oil prices are rallying amid economic sanctions on Russia which will impact freight charges and will support rising prices of various commodities.

Geo-political tension between Russia and Ukraine continues to support edible oil prices internationally as well as domestically, as it has impacted edible oil supply chain globally.

Soybean oil

- Prices are expected to remain steady with upward bias for coming weeks as people are stocking up oils fearing further rise in prices.
- China is actively buying soybeans from US as harvesting in Brazil is hampered due to rains and currently US prices are lower than that of Brazil.
- China's Jan-Feb 2022 soybean import rose by 4.1 percent to 13.94 MMT compared to 13.41 MMT last year.
- Argentina receives good rains which may ease the prevailing drought conditions in soybean key growing areas.
- CBOT Soy oil prices continues to take support from rising crude oil prices and competing oils prices.

Palm oil

- Tension between Ukraine and Russia fueled the prices. Prices are readjusting to stabilize the food inflation.
- Domestic palm oil prices had shot up too high that it had premium over competing oils which will affect its market share
- MPOB expects Malaysia palm oil prices to remain elevated above 5,000 Ringgits for the first half of year 2022 amid supply shortages of edible oils.
- Low supplies of palm oil from Indonesia are hurting the international buyers. Countries are urging Indonesia to increase their palm oil exports.

Mustard oil

- Mustard oil prices are trading sideways. Higher crop production will curb prices however, firm sentiment for all the edible oil basket internationally may minimize the price pressure.
- USDA has estimated India's mustard seed production at 108 LT.
- Correction in mustard oil prices will be limited due to firm prices of competing oils.
- COOIT expects mustard crop for Rabi 2022 at 100-110 lakh tonnes (LT) compared to 85 LT last year. Agriwatch has
 estimated the RM seed production to be at 105.2 lakh tonnes for year 2021-22.

Outlook: Edible oil basket is expected to feature sideways with upwards sentiments for the week.

CBOT Soy Oil Futures (Projections): (Values in US cents/lb.)
