

### **Domestic Fundamentals:**

Edible oil basket traded with mixed sentiments at various markets. Palm oil, soy oil, groundnut oil and sunflower oil prices traded with weak sentiments at various markets. While, Mustard oil traded steady at their respective markets.

GOI has issued Notification No. 46/2022-Customs dated 31<sup>st</sup> August 2022 vide under which the current duty structure on Crude Palm Oil, RBD Palmolein, RBD Palm Oil, Crude Soybean Oil, Refined Soybean Oil, Crude Sunflower Oil and Refined Sunflower Oil remains unchanged till 31<sup>st</sup> March 2023. Soybean oil and Sunflower oil continue to be permitted for import at NIL Duty under TRQ allocation.

### Soybean oil

- No change in import duty of edible oil is likely to continue the weak momentum in domestic edible oil prices. Higher soy oil imports in July leading to higher supply side is also weighing on the price gains.
- Brazil may witness increase in acreage under soybean, which is pressuring the CBOT prices as supply side is already high.
- For Long term, CBOT Soy oil prices are indicating towards bearish sentiments as higher US soybean productions are estimated which would render to higher supply side. However, dry conditions in USA's soybean growing region are supportive of prices for short term.

### Palm oil

- BMD prices are trading sideways with weak bias as higher supply side is weighing on prices.
- Indonesia to lower the threshold for palm oil export levies from 1<sup>st</sup> November. Indonesia has extended the levy waiver on Palm oil export till 31<sup>st</sup> October 2022.
- Indonesia will raise their reference price for palm oil export, increasing its export tax to \$124 per tonne compared to \$74 per tonne previously. However, export levy is waiver off till October 31<sup>st</sup>
- Domestic palm oil prices are under correction in tandem with weak soy oil prices.

### Mustard oil

- Mustard oil prices broke the previous range of 1310-1410/10 Kg and lowered to Rs 1290/10 Kg. Prices are likely to trade with weak momentum for the coming 2-3 weeks pressured by correction in competing oils.
- Mustard oil prices are currently following competing oils' momentum as it is premium to both palm and soy
- Price reversal may happen as festival demand would pick up.

Outlook: Edible oil basket is expected to trade with weak sentiments for the week

### **Sowing Update:**

Area Covered (Lakh Ha) as of 2 September 2022
