

Domestic Fundamentals:

Edible oil basket traded with firm sentiments at various markets. Palm oil and Soy oil traded up. While, Sunflower oil markets traded down, and Mustard oil and Groundnut oil traded steady at their various markets.

"Government exempts Wholesalers and Big Chain retailers from the Stock Limit order"

According to PIB's press release, the Government has issued a notification on Tuesday, for exempting the category of Wholesalers and Big Chain retailers from the current Stock Limit order. The order will come into effect immediately. In view of restoration of ample supplies and continuous decline in the prices of edible oils both in the international as well as domestic market, it was an opportune time for exemption of wholesalers and Bulk consumers (big chain retailers' shops) from the stock limit control order. The removal will also have a positive effect on the oilseed prices as it will boost procurement of the oilseeds hereby increasing the returns of domestic oilseeds growing farmers.

Soybean oil

- Domestic Soy oil market is likely to trade sideways as festival demand is over. However, market is likely to be underpinned in tandem with rising CBOT soy oil prices.
- CBOT Soy oil corrected marginally as Russia agrees to join in "Black Sea Grain Deal".
- Rising logistics charges in Mississippi is likely to support the soy oil prices. Rising crude oil prices may also support positive trend.

Palm oil

- Domestic prices are likely to traded sideways with weak sentiments as festival demand is over and its consumption declines in winter season.
- BMD Palm Oil Futures, December Contract corrected down, in tandem with declining crude oil prices.
- Heavy rainfall in Indonesia and Malaysia, due to La Nina's impact is affecting crop harvesting.

Mustard oil

- Mustard oil prices are trading up as anticipated. Cool weather in North India, is likely to boost mustard oil demand
- According to Ministry of Agriculture, as on 28th Oct'22, All India Rabi Mustard sowing progress is up by 33.64% to 18.99 Lakh hectare as compared to 14.21 Lakh hectare last year in the same period.
- The environment ministry's Genetic Engineering Appraisal Committee (GEAC) has recommended the environment release of genetically modified (GM) mustard hybrid DMH-11. Indian Non-GM mustards per hectare yield is very low at less than 1000 kg, while the global average is around 3000 kg/ Ha. GM Mustard will boost yield and will give better return to the farmers.

Outlook: Edible oil basket is expected to trade with sideways with upward sentiments for the week

Sowing Update:

| Rabi 2022-23 acreage statistics | | | | | | |
|---|--------------------|-------|---------|--|--|--|
| Area Covered (Lakh Ha) as of 4 October 2022 | | | | | | |
