### Soybean oil

- In the Domestic market, the Soy oil market closed slightly up as demand improved slightly.
- Soy oil domestic market is likely to be underpinned by rising CBOT Soy oil international prices.
- CBOT Soy oil is trading up due to dry weather in Argentina.
- In Argentina, the soybeans were 81.8% planted as of late last week compared to 93.5% last year and 92.8% average. Hot and dry weather prevailed across most of Argentina over the weekend with temperatures. The soybean planting window in Argentina generally closes about the second week of January, but as of late last week, 19% of the soybeans had not been planted due to dry conditions, which equates to a little more than 3 million hectares. The 2022/23 soybeans in Argentina are rated 38% poor/very poor, 54% fair, and 8% good/excellent. The good/excellent percentage is down 2% from the previous week. The soil moisture for the soybeans is rated 43% short/very short and 57% favourable/optimum. The favourable/optimum percentage is up 1% from the prior week. CBOT Soy bean most active March Contract trading near three weeks high to \$15.27/bushel amid increasing concerns about drought hurting crops in Argentina.

#### Palm oil

- Domestic prices traded marginally up for the day.
- International Palm oil prices are trading down amid weak export demand.

#### Mustard oil

- Mustard oil prices traded steady for the day.
- The anticipation of early arrival of new mustard crop is also pressuring the mustard seed and oil prices.
- Mustard seed crushing is still in disparity as oil prices are trading with weak sentiments.
- As of 13<sup>th</sup> January, All India mustard crop sowing stood at 96.85 Lakh Ha compared to 89.78 Lakh Ha in previous year for same period, which is up by 7.87%.

Outlook: Edible oil basket is expected to trade with sideways with weak bias for the week.
