

Domestic Fundamentals:

Edible oil basket traded sideways at various markets. Mustard oil market trade steady. While, Sunflower oil, Soy oil, groundnut oil and Palm oil market prices traded down for the day.

Soybean oil

- In the Domestic market, the Soy oil market traded with weakness as buyers are cautious amid volatility in the market.
- The Rosario Grains Exchange of Argentina (BCR) reduced its forecast for the 2022/23 soybean harvest to 34.5 million tonnes on Wednesday, down from its earlier prediction of 37 million tonnes. This would be the lowest soybean production in the last 14 years.
- Uncertainty in Argentina's soybean crop is supporting CBOT Soy oil prices.

Palm oil

- Domestic market weakened following weakness in international palm oil prices.
- Malaysia's Palm oil stock for January rose by 3.26 percent to 22.68 lakh tons compared to 21.96 lakh tons in December 2022 despite correction in Palm oil Production. Production of palm oil fell by 14.73 percent to 13.80 lakh tons compared to 16.18 lakh tons in December 2022.
- Indonesia is taking various steps to ensure enough domestic supply ahead of Islamic festivals. Indonesia plans to raise Crude Palm oil export tax to \$74/T from \$52/T and exports levy to \$95/ton from \$90/ton, as reference prices to set at \$880.03/Ton for Feb 16 28 shipments, up from previously set at \$879.31/Ton.
- Indonesia may also suspend some palm oil export permits, as quoted by senior cabinet minister Luhut
 Pandjaitan. Under the "Domestic Market Obligation" (DMO), Indonesia has tightened its export
 volumes of six-times what the companies have sold at home, down from 8 times previously.

Mustard oil

- Mustard oil prices traded steady for the day at various market.
- Prices are likely to correct downwards amid arrival of new crops in the market. However, Mustard oil
 premium over Soy oil and other competing oils have lowered significantly which will limit the fall in
 prices.
- Continuous arrivals of new crop are expected to start from 3rd week of February.
- Arrivals has crossed 2 lakh bags, all over India.
- **AgriWatch** is expecting 10-12% losses in mustard crop in Rajasthan due to cold wave and production to remain in the range of 42-45 LT same as last year.

Outlook: Edible oil basket is expected to trade sideways for the week.

Sowing Update:

Final Acreage

| Rabi 2022-23 acreage statistics | | | | | | |
|--|--------|--------|------------------------|--|--|--|
