### Soy oil Fundamental Analysis and Outlook:-

#### Domestic Front

- Soy oil featured sideways trend in domestic markets in the week in review on sideways trend in prices of soy oil in international markets.

Soy oil demand is steady at high seas as its prices rise at high seas compared to CNF markets compared to last week.

Demand of soybean in poultry is improving and resulted in high exports of Soymeal and Soy Oil on good demand from China.

Soy oil stocks in oil year 2019-20 will be under pressure on lower supply of soy oil and higher use of soy oil. This will support soy oil prices in coming months. Increase in domestic supply has lower the pressure on low market.

Imports of soy oil fell in November due to higher prices of soy oil in international markets, negative import parity and refining margins in November. However, imports of soy oil will rise in Dec due to high seasonal demand, demand ahead of festivals, lower stocks of soy oil in ports and pipelines, lower supply of domestic crushed soy oil and high discount over rapeseed oil and sunflower oil.

CDSO premium over CPO at high seas is high and may cap gains while refined soy oil discount over rapeseed oil is high so may increase demand. In USD terms, premium of CDSO CNF over CPO CNF is high and decrease demand of CDSO at CNF markets. Further, refined soy oil discount over refined sunflower and soy oil CNF discount over sunflower oil CNF is high may support soy oil prices. Moreover, refined soy oil premium over RBD palmolein is high may cap soy oil prices in domestic markets.
