

## Wheat Domestic Fundamentals:

- **Glencore has won a tender to supply 50,000 tonnes** of wheat to Bangladesh at \$303 a tonne including CIF liner out which could be sourced from India as it is competitive with rival supplies from the Black Sea region, as per trader.
- **Recent showers of rains are expected to boost yield of standing** wheat crop. Crop condition throughout major producing states is in good to excellent shape so far. Market participants have started talking around 100 million tonne crop size. Under current crop condition and favourable weather India can expect the best yield realized in 2011-12.
- **However, temperature in Feb-March would remain the crucial factor** for the final size of the crop. Wheat quality in Gujarat has been reported excellent this year and traders/exporters offered higher price for newly harvested crop, just started hitting into the market. Traders offered Rs 1720/Rs 1750 per qtl. for new crop. Some multinational companies have planned to store local wheat in Gujarat for export purpose. Market participants expect active buying by exporters by the end of this month.
- **According to IBIS (provisional data), export of wheat in the month of January** was 5.01 Lakh tones which is around 36% less than last year at the same month, which was 7.81 Lakh tones in December 2012.
- **Indian Exporters have entered in forward contract for March delivery at USD 265-266/MT** of Gujarat, Madhya Pradesh and Rajasthan origin wheat. For April delivery forward contracts have concluded at USD 262/MT, according to traders.
- **PSU's wheat export bid may further fall in coming tenders due to** recent harvest concluded in Australia and lower FOB there. Indian wheat export is becoming noncompetitive to Australian export as Australian FOB for Soft Wheat is hovering near USD 250-255/MT.

## International Market Update:

- **USDA's latest global production estimate is 712.65 million T** for 2013-14 against 656.44 million T in 2012-13.
- **CBOT wheat futures firmed up as U.S cuts global and domestic stocks.** U.S reserve in May end 2014 is expected to decline to 15.18 million tonnes against January -2014 forecast of 16.5 million tonnes.
- **Export from U.S is expected to increase by 4.4 % in Feb-2014 from** the outlook of Jan-2014.\*Export are increasing on demand for hard red winter wheat due to smaller supply from Canada and Argentina.
- **Global inventory has been slashed down from 185.4 million tonnes** (Jan estimates) to 183.73 million tonnes. However, it would be very crucial to see how the crop emerges from winter dormancy next month(March). It would set the ultimate trend.
