

Wheat Domestic Fundamentals:

- **Wheat production is likely touch record level of 96.03 million tonne** this year(2013-14) despite considerable loss of crop in parts of Madhya Pradesh and Rajasthan. The main reason for higher production is attributed to higher area coverage and favorable weather throughout the season except the second fortnight of February when heavy rains fall and hails storm affected the quality of grains adversely.
- **Carry out includes private stock of 1 to 1.5 million tonne.** Thus production would be 1.29 percent higher than last year. However, temperature in March remains crucial for late sowed crop in Uttar Pradesh and Bihar. Abnormal rise in temperature may affect the grain size and has potential to downgrade the final size of the crop in both the states.
- **With 24.04 million tonne carryout total availability for 2014-15** marketing year would be around 120.67 million tonne against the total usage of 94 million tonne including export. Carryout for next season would increase from 24.64 million tonne to 26.67 million tonne, an increase of 8.23 percent. This implies sufficient supply throughout the season.
- **Export quantity has been downgraded to 6 million tonne as favourable** condition for Indian wheat in the global market is unlikely to continue in the third quarter with expected arrivals in Black Sea Region from June onward. Australian crop too would start hitting the market from October and it may pressurize wheat prices in the global market.
- **Wheat export markets for India remains favourable basically** on two counts. US may impose trade sanction on Russia. Supply from Ukraine would decrease considerably as tension between Russia and Ukraine continues. Under this background buyers from overseas market are turning to India and prices in domestic market have increased by \$10 to \$15 per tonne in last three weeks.

International Market Update:

- **Tunisia's state grains agency purchased 34,000 tonnes durum wheat** in two 17,000 tonne consignments at \$435.49 and \$437.89 a tonne c&f and seller of both was Casillo Commodities.
- **Global 2013/14 wheat supplies are raised slightly with a 0.8-million-ton** increase in world production. Production is raised 1.1 million tons for India and 0.5 million tons for Australia. China is lowered 0.3 million tons, Uruguay by 0.3 and Paraguay by 0.2 million tons respectively.

Domestic market Outlook: Cash wheat market is likely to trade steady to slightly weak.
