

## Wheat Domestic Fundamentals:

- During the peak arrival season prices of wheat in Uttar Pradesh continued to rule firm due to ITC aggressive buying. However, under changed circumstances ITC has stopped buying in Uttar Pradesh as outlook turned bearish. Today wheat in Bulandshahar is being traded at Rs 1405 per Qtl. Traders expect prices to decline further and may touch Rs 1370/75 per qtl. as major buyers are out of the market now. Other stockists too are sellers in diminished export opportunity. Wheat from Bulandshahar is being loaded at Rs 1500 per qtl. for Delhi. This includes 1 percent CST, Rs 5 per qtl. commission and Rs 55 per qtl. freight.
- Pressure on domestic wheat market continues as bulk buyers/exporters have opted to remain out of the market in bearish global outlook. Despite ongoing issue between Russia and Ukraine, export offers on attractive price continue on large scale. Russian FOB quote has decreased from \$276 to \$250 per tonne in last 15 days. New crop in Russia and Ukraine is in good condition and both the countries have much marketable surplus to offer. New crop would start hitting the market by the end of June and it would pressurize price globally. CBOT Futures contracts too have declined in last two-three weeks. Weak export data from US, higher marketable surplus and importers reservation against buying bulk quantity remain the price limiting factors. More dip is expected in the global wheat market in the weeks ahead.
- All these developments are going to impact domestic price of Indian wheat. Export opportunity for Indian wheat seems bleak at this point of time. Private stockiest, who have brought 6.4 million tonne wheat from open market at price higher than MSP, are sellers now in domestic market in diminishing export opportunity. Supply would remain higher than demand. However, any steep fall is unlikely. During lean season starting from July prices of wheat may improve slightly. However, expectation of any bullish trend seems a remote possibility.
- By the end of May, 2014 total arrival of wheat in major markets registered at 34 million tonne. Out of total arrivals FCI and other state agencies have brought 76.82 percent, while private trade contribution was registered at 23.18 percent. Actually, this year private trade's buying has increased considerably with hope of better export opportunity. Higher private participation encouraged wheat price in the season and prices continue to rule over MSP in many states. This year private trades, including flour mills, have brought around 6.4 million tonne wheat.
- Wheat stock in central pool warehouses was registered at 41.58 million T on 01 May compared to 34.40 million T on 1st May 2014. The highest accumulated stock is in Punjab (16.15 million T) followed by Madhya Pradesh (8.26 million tonne) and Haryana (7.89 million Tonne) as on 01.06.2014.

## International Market Update:

- According to the International Grains Council, world production is projected to fall by 2% to 694m t in 2014/15 with average yields retreating from last season's unusually high levels.
- Indonesia has bought around 125000 tonnes of wheat from Russia at USD 290-295/tonne (c&f) for shipment between mid-July and mid-August. That compares with a price of \$305 being quoted for Indian wheat and around \$320 to \$330 a tonne offered for U.S and Australia for the same period of time. As FoB quotes of Russia remains competitive than other major wheat exporting countries many more deals are expected to be made.
- Crop from Black Sea Region, Russia-Ukraine is due in July. Recent rains in US wheat growing belt have improved the production prospects. The droughty southern Plains (US) received much needed rainfall before the weekend, which could significantly boost winter wheat harvest prospects. Discouraging export demand for US wheat signals weak global market fundamentals.

## Domestic market Outlook:

Cash wheat market is likely to trade steady to slightly weak.
