

Wheat Domestic Fundamentals:

- With the end of procurement season and increasing demands for wheat products prices of wheat may increase by Rs 30 to Rs 50 per quintal. By the end of July, private trades have restricted release of wheat in open market as prices are not matching their interest. They had procured wheat at higher than MSP in anticipation of higher export. Now prices in the open market are hovering near MSP and so they have decided to hold on stock at least for two months. Now their retaining cost including procurement cost has gone up to Rs 1550 per quintal against the prevailing rate of Rs 1400 to Rs 1500 per quintal in various mandis of Uttar Pradesh.
- ITC can start procuring wheat once again in Uttar Pradesh. Government would start releasing wheat for OMSS July end and price for OMSS may be revised slightly up (Rs 50 per qtl.) from last year. All these developments may encourage wheat price in the weeks ahead.
- Despite of slower start of procurement, wheat procurement by the end of June touched 27.9 Mn t as expected in April by Agriwatch. It is 10% higher from last year due to higher lifting from Punjab, Haryana and MP.
- Total arrival in grain market by the end of June registered at 34.5Mnt on all India basis out of it 27.9Mnt have been lifted by FCI and other state agencies, the remaining 6.6Mnt has been lifted by private trades and flour millers.
- Demand for wheat product in festive season is expected by the end of July and it will help wheat price to get firmer in the weeks ahead. However, supply side will remain ample as farmers in UP still holds 20-30 % marketable surplus stock in their hands, the stock will continue to hit market in July.
- On export front there is no hope as bearish tone continues to dominate global market on the back of higher production prospects in Black Sea Region and ample marketable surplus in US. Russia and Ukraine has sold out wheat to Pakistan at \$260 per tonne on c&f basis to be delivered in July and August. Against this India is unable to offer below \$263/64 per tonne on FOB basis. As domestic market is expected to get firmer July onward, it would be very difficult for Indian exporters to compete from Russia and Ukraine.

International Market Update:

- Private importers in Pakistan have purchased about 55,000 tons of Black Sea-origin wheat probably from Russia or Ukraine around \$266 a tons c&f for August/September shipment. They are still negotiating on more wheat purchases as bad harvesting this year have generated the import demand.
- The US wheat exporters may see tough time in the months ahead. Acting chairman of the US department of Agriculture outlook board Seth Meyer has expressive some pessimistic view on export front. According to him US exporters have to face the problem of lower availability of wheat for export. US winter crop size is expected to be lower by 10 percent from last year. Besides, total wheat supply may decrease by 11 percent. Wheat production prospects at global level too has improved in recent weeks. IN EU, wheat production may increase by 1.4 million tonne. Russian can harvest 1 million tonne higher wheat than last year. Better production prospects for China is not a remote possibility. All these developments hints towards lower export prospects for US wheat. US wheat export may decrease by 21 percent in current season.
- CBOT wheat futures improve after having a five week slide. Actually, market has traded up due to increasing expectation that buyers would take fresh position at the lower level. Besides, rains in US plains, where crop is in maturity stage, may affect grain quality. Forecast for rains in the central and south west wheat growing belts may hamper harvesting by a week or two. Rains on matured wheat may affect grain weight and its baking quality.

Domestic market Outlook:

Wheat cash market may stay steady to slightly firm.
